ANNUAL REPORT

OF THE

Secretary of Internal Affairs

OF THE

Commonwealth of Pennsylvania,

FOR THE

YEAR ENDING NOVEMBER 30, 1895.

PART I.—LAND OFFICE.
BOUNDARY LINES.
STATE WEATHER SERVICE.
PART II.—ASSESSMENTS.
TAXES.

CLARENCE M. BUSCH,
STATE PRINTER OF PENNSYLVANIA.
1896.

REPORT

OF THE

Secretary of Internal Affairs.

COMMUNICATION.

DEPARTMENT OF INTERNAL AFFAIRS,
HARRISBURG, *February 1, 1896.*

To His Excellency, DANIEL H. HASTINGS,
Governor of the Commonwealth of Pennsylvania:

Sir: Complying with the requirements of the Constitution, I have the honor to present you herewith, for transmission to the General Assembly, reports of this Department for the year ending November 30, 1895, as follows:

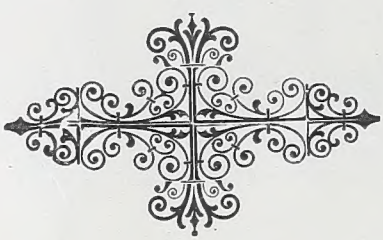
Part I, Land Office.
Boundary Lines.
State Weather Service.

Part II, Assessments.
Taxes.

Very respectfully,
Your obedient servant,
JAMES W. LATTA,
Secretary of Internal Affairs.

1 A.--7--95

181287



The Department of Internal Affairs, as organized, consists of six Bureaus, designated as follows:

1. *Land Office.*
2. *Boundary Lines and Monuments.*
3. *State Weather Service.*
4. *Assessment and Taxes.*
5. *Industrial Statistics, including Mine Inspection.*
6. *Railroads, Canals, Telegraphs and Telephones.*

A record of the business of the department is published in five parts:

Parts I and II, Land Office, Boundary Lines, State Weather Service, Assessments and Taxes.

Part III. Industrial Statistics.

Part IV. Railroads, Canals, etc.

Part V. Reports of Mine Inspectors of the Coal Regions.

PART I--Land Office.
Boundary Lines.
State Weather Service.

REPORT.

DEPARTMENT OF INTERNAL AFFAIRS,
HARRISBURG, *February 1, 1896.*

To His Excellency DANIEL H. HASTINGS,
Governor of Pennsylvania:

Sir: As required by the constitution and law, I submit herewith a detailed report of the business of the Department for the year ending on the 30th day of November, 1895.

Respectfully submitted.

JAMES W. LATTA,
Secretary of Internal Affairs.

Statement.

Showing the number of warrants, patents and certificates to the State Treasurer, issued from December 1, 1894, to November 30, 1895, both days included, with the amount of purchase money and fees for warrants, patents, etc. Also, copying fees received during the same period.

Year and Month.	Warrants.	Patents.	Certificates to State Treasurer.	Purchase money.	Warrant and patent fees.	Fees for certificates to mine foremen.	Copying fees.	Totals.
1894, December,	3	1	4	$30 76	$25 00	$3 00	$116 25	$175 01
1895, January,	1	4	5	13 03	50 00	18 00	88 25	169 28
1895, February,	3	4	7	36 05	70 00	3 00	84 25	193 30
1895, March,	2	1	3	17 08	20 00	12 00	153 25	202 33
1895, April,	1	3	4	2 29	35 00	15 00	164 75	217 04
1895, May,	1	4	5	153 10	51 72	6 00	123 00	333 82
1895, June,	...	...	...	...	...	...	135 00	135 00
1895, July,	7	2	9	50 93	57 50	165 00	109 50	382 93
1895, August,	8	6	14	669 38	110 00	291 00	134 25	1,204 63
1895, September,	...	6	6	393 39	65 00	69 00	103 75	631 14
1895, October,	1	...	1	21 87	5 00	18 00	109 75	154 62
1895, November,	2	1	3	258 10	25 00	18 00	147 25	448 35
	29	32	61	$1,645 98	$514 22	$618 00	$1,469 25	$4,247 45

Detailed Statement.

Of fees received for the year ending November 30, 1895:

551 copies of surveys,	$551 00
245 copies of patents,	245 00
119 copies of warrants,	59 50
92 searches,	23 00
55 connected drafts, embracing 248 tracts,	186 00
60 copies of applications,	30 00
268 copies of miscellaneous papers,	374 75
29 new warrants issued,	145 00
206 mine foreman and assistant certificates issued,	618 00
32 patents issued,	369 22
	$2,601 47

Recapitulation.

Purchase money,		$1,645 98
Warrant and patent fees,	$514 22	
Mine foreman certificates,	618 00	
Copying fees,	1,469 25	
		2,601 47
		$4,247 45

RESUME OF THE BUSINESS OF THE DEPARTMENT FOR THE YEAR ENDING NOVEMBER 30, 1895.

Letters and Reports Received, Endorsed and Filed.

7,230 relative to land office, railroads and assessments.
7,920 relative to industrial statistics.

Letters Written, Copied and Indexed.

3,592 relative to land office and assessments, railroads, etc.
784 relative to industrial statistics.

Reports and Railroad Maps Distributed, Blanks, Certificates and Circulars Forwarded and Certificates Issued and Recorded.

1,830 reports on lands and assessments, vital statistics and weather service.
2,460 reports on industrial statistics.
1,920 reports on railways, canals, telegraphs and telephones.
1,140 blanks relative to land office business.
10,200 blanks relative to industrial statistics.
3,300 blanks relative to railroads, taxes and assessments.
206 mine foremen's certificates issued.
206 mine foremen's certificates recorded.
5, 236 railroad maps of Pennsylvania distributed.

Land Office.

1,872 copies of original papers certified and issued under the seal of the department.
15,620 searches for applications, warrants and surveys required for copies, patenting and connections and refiling the same.
3,965 entries in fee, account and cash books, and transcribing the same quarterly for settlement with the Auditor General.
4 quarterly returns to the Auditor General.
55 applications for warrants received and entered on register.
35 applications for patents received and entered on register.
55 applications for warrants endorsed and filed.
35 applications for patents endorsed and filed.
29 tickets issued for warrants.
32 tickets issued for patents.
29 new warrants issued, registered, numbered and filed.
29 warrants issued and directed to county surveyors for execution.
21 new surveys from county surveyors calculated and compared with warrants.

8,570 searches made and transcribed for new index.

21 new surveys entered on surveyors' list of returns, numbered and filed.

5 new surveys containing an excess of land calculated, compared with warrants and placed in excess files.

6,396 entries in new register covering names of warrantees, dates of return, names of patentees, number of acres returned, where recorded, etc.

13,572 entries in new index covering warrantee and patentee names, acreage, date of warrant and books and page of record.

6 new surveys calculated, compared with warrants and returned to the county surveyor for correction.

32 entries on warrants, or applications, of the time of patenting.

32 entries on warrant registers of the time of patenting.

112 calculations of sums due.

76 certificates of sums due State Treasurer.

76 State Treasurer's receipts entered and delivered to Auditor General.

76 vouchers entered in fee book.

76 vouchers numbered and filed.

29 warrants issued, embracing 3,875 acres of land.

32 patents written, recorded and endorsed, embracing 9,339 acres and 112 perches of land and one lot.

16 satisfactions of liens on land lien docket.

16 certificates of liquidation made out and forwarded to the prothonotaries of the several counties, under act of 4th day of April, 1868.

24 caveats entered, recorded on caveat book and filed.

7 citations issued and noted on caveat book.

12 monthly statements delivered to the Auditor General.

206 mine foreman's certificates issued and recorded.

40,567 additional entries made in the revising and compiling of new warrant indexes.

2,595 old surveys copied for binding.

275 copies of large surveys of tracts of land in the 17 certified townships of Luzerne, together with the certificates and assignments of the same, covering 520 pages of manuscript.

67 assessment reports of the counties of the Commonwealth, compiled and consolidated, showing the number of taxables, number of acres of cleared land, number of acres of timber land, value of real estate taxable, value of real estate exempt from taxation and value of all real estate; number and value of horses, mares, geldings and mules over the age of four years, number and value of neat cattle over the age of four years; value of salaries and emoluments of office, posts of profit, profession, trades and occupations; aggre-

gate amount of county tax assessed; amount of money at interest, including mortgages, judgments, bonds, notes, stocks, etc.; value of stages, omnibuses, hacks, cabs, etc.; aggregate value of all property taxable for State purposes at four mills on the dollar, including money at interest, stages, omnibuses, hacks, cabs, etc.; aggregate amount of State tax assessed, and the amount of debt of each county, with a comparative statement of each item from the report of the year 1894.

66 tax reports of the counties of the Commonwealth, compiled and consolidated, showing the entire amount of tax collected or worked out for the maintenance of State, county, city, ward, borough and township governments; the total amount collected for the support of the poor; the total amount collected for the construction and repair of streets, roads and bridges; the amount collected for school purposes; the amount collected on personal property, on occupations and licenses; the amount collected on real estate of railroad corporations; the amount collected on real estate of corporations other than railroads, including limited partnerships, in the several assessment districts of the Commonwealth, between the 1st day of June, 1894, and the 31st day of May, 1895, made pursuant to the act of assembly approved the 9th day of May, A. D. 1889.

944 railroad, street railway, canal, telegraph and telephone companies registered.

424 reports of railroad companies tabulated, showing capital stock and dividends, debt and interest, cost of road and equipment, mileage equipment and number of persons employed; miles run by trains and their speed, number of passengers carried and cost per mile, kind of freight carried in tons and cost per ton; earnings and income; expenses during the year and accidents, together with comparative statements showing figures for the past five years.

487 street railway reports tabulated, showing stock and debt, cost and characteristics of road, passengers and expenses, receipts and accidents, with a comparative statement of each account for five years.

8 canal company reports tabulated, showing stock and debt, cost and characteristics of canal tonnage, expenses and receipts, with a comparative statement for five years.

25 telegraph and telephone company reports tabulated, showing stock, debt, cost and characteristics of line, expenses and receipts, with a comparative statement for five years.

308 checks issued for payments to State Treasurer, and disbursements on account of appropriations under act of assembly.

2 meetings of the Board of Property held during the year, the proceedings of which covered seven pages of the minute book.

LAND OFFICE BUREAU.

Board of Property.

During the year there have been few cases passed upon finally by the Board of Property, involving questions that have not already been settled by the opinion of the board or the decisions of the courts of the Commonwealth. The most novel case presented was one arising from the filing of a petition under date of November 21, 1895. From this petition and the records filed in the department it appears that James S. Cross a number of years ago made application for vacant land, and, under the provision of the act of 1874 made publication of his intention, giving a description of the land, as required by law. Soon after the filing of the application and before a warrant was issuable, a caveat was filed against the granting of the warrant. On petition a citation was issued, returnable before the Board of Property, which tribunal considered the case, both parties thereto appearing and presenting evidence. The board was of the opinion that the land applied for by Cross was covered by prior rights granted by the Commonwealth, and, therefore, sustained the caveat and directed the Secretary of Internal Affairs to withhold the granting of a warrant, and, in accordance with the act of 1874, to return the purchase money to Cross. From the petition referred to it appears that either before the consideration of the case by the board, or immediately thereafter, Mr. Cross sold all his right, title and interest in the land to other parties who were not represented at the time the case was considered. Whether the sale by Cross was made before the hearing or subsequently does not appear from the records of the case, except as disclosed by the petition. Some time after the board had refused to grant a warrant to Mr. Cross, he sent a request, over his own signature, for the return of the purchase money and the warrant fee, which had been deposited with his application. The Secretary of Internal Affairs knowing nothing of the transfer of any rights which Mr. Cross might have acquired by virtue of his application, returned the purchase money and fee to him. It appears, however, from the petition, that at the time the money was returned to him actions of ejectment were pending between the grantees of Mr. Cross and other parties claiming under prior rights. The

grantees of Mr. Cross were resting their claim upon the rights they had acquired as purchasers of his rights as a rejected applicant, and they apparently had no knowledge whatever of the money deposited by him having been withdrawn.

The case thus put at issue had been through the courts of common pleas, and had, on an appeal taken, been passed upon by the Supreme Court of Pennsylvania, without having had the question raised as to the purchase money having been withdrawn by the original applicant. The petition presented in the case prayed that the Board of Property would permit the grantees of said Cross, under his rights as an applicant, to now deposit the purchase money and fees which had wrongfully been withdrawn, as they claimed, by Mr. Cross. At the close of the year the question put at issue by the presentation of this petition was still pending before the board under a rule granted to show cause why such deposit should not be allowed, service to be made on all parties in interest. The consideration of the matter at issue in this case involves the construction of the act of 1792 relating to proceedings before the Board of Property. For the guidance of those who may have cases for consideration by the board, it is thought proper to give at some length a rule which seems to have been adhered to in all proceedings before the board. The act of 1792, as construed by the Board, and so far as we know by the courts of the Commonwealth, with reference to the consideration of caveats filed against the granting of patents, applies alone to patents and not to warrants. The careful reading of this act will admit of no other construction. Among other things it says that when a caveat is determined by the Board of Property, the patent shall nevertheless be stayed for a term of six months, within which time the party against whom the determination of the board is made may enter suit at common law, but not after the expiration of the six months; and the party in whose favor the determination of the board is made shall be deemed to be in possession, although the opposite party may be in actual possession. The act further provides that if no action is brought within six months from the determination of the matter by the board, a patent shall issue according to the decision of the board, upon the presentation of a certificate from a prothonotary of the proper county that no suit has been commenced. The act further provides that in case a suit has been commenced, upon its determination, the patent in the usual form shall be granted to the successful litigant. If it were the intention of the legislature in 1792 to make the act referred to apply to all proceedings before the Board of Property which relate to caveats against granting warrants, it certainly failed to express itself clearly as to its intention. Records of the Board of Property, so far

as we have been able to discover, show clearly that it has been uniformly held that the act of 1792 applies only to patents. Therefore, when the board has under consideration the application of a person for vacant land, against which a caveat has been filed, and the caveat has been overruled, it has been the practice to issue the warrant at once to the applicant, and not to wait six months for the defeated party to bring his action of ejectment, as is required in the consideration of caveats against the granting of patents under the act of 1792.

We do not know of any case in which the Supreme Court has passed upon the act of 1792, so far as this particular question is concerned, and we doubt whether any one familiar with the laws of original titles would have the temerity to raise the question whether or not this act applies to warrants as well as to patents. Certainly, if the legislature had intended to make the provision referred to in the act of 1792 apply to warrants it would only have been necessary to have added a few words to the act, to make it so apply. Whatever doubts, if any, may have existed prior to 1874, must have been dispelled by the act of April 14, 1874, which regulates the making and filing of applications and the granting of warrants. This act specifies particularly what the application shall contain. A description of the land applied for and a copy of the advertisement of the intention to make application. It also provides for the proceedings before the Board of Property where caveats are filed against the granting of warrants. Where the Board of Property has passed upon the application for vacant land and overruled the caveator, it has been the universal practice to grant the warrant immediately after such determination, and we can find no case on record where it has been claimed that the granting of the warrant should be stayed for a period of six months, as is required by the act of 1792, in the case of applications for patents. On the other hand, where the board has sustained the caveator, it has generally been the practice to return the money to the unsuccessful applicant, unless, for any reason, the applicant desires that it remain on deposit. It has often been argued before the board, when questions have arisen between the applicant and caveator, that the benefit of all doubt should be given to the applicant, for the reason that in case the board refuses to grant the warrant, he has no further means provided by law by which to press his claims. In other words, the filing of the application and payment of the purchase money, where the warrant has been refused, does not alone give sufficient color of title in the applicant to enable him to sustain an action of ejectment against the caveator or any other person claiming the land described in his application. It is a fact that

some parties have commenced actions of ejectment at common law within a period of six months after the board has passed upon the rights of an applicant to a warrant, upon the supposition that the act of 1792 applied to warrants, but a careful reading of the act of 1874, regulating proceedings before the Board of Property with reference to the rights of applicants for warrants, and of the act of 1792, will make it clear that the former applies to warrants and the latter to patents.

The duties devolving upon the Board of Property are burdensome when considered in connection with other duties imposed on the members thereof in the other offices they fill, as important matters are brought before it, involving the most intricate questions of law. It is a fact beyond dispute that the legal propositions involved in the law of location and other questions pertaining to original titles require the most careful study, and the application of the most conservative and mature consideration. They are as difficult to solve as any of the problems adjudicated in the several courts of the Commonwealth.

The regular sessions of the Board of Property are bi-monthly, but it is not often that the duties incumbent upon the members of the board in connection with their other official positions will permit them to devote the time and consideration demanded by the question involved.

Maps, Reports, Etc.

Maps and reports have been numbered and filed among the department records during the past year as follows, to wit:

Railroads.

No. 77. Brady's Bend and Lake Erie railroad map, showing the location of the line, filed January 1st.

No. 78. Essington and Chester railroad map, showing location of the line; filed, October 31, 1895.

No. 79. Chester and State Line railroad map, showing location of line in Delaware county; filed, November 29, 1895.

No. 80. Philadelphia and Essington railroad map, showing location of the line in Philadelphia and Delaware county; filed, November 29, 1895.

Counties.

No. 145. Application for the erection of the county of Grow out of portions of the county of Luzerne; filed, March 12, 1895.

No. 146. Application for the erection of the county of Quay out of portions of the county of Luzerne; filed, March 19, 1895.

No. 147. Certificate of the appointment of commissioners for the purpose of inquiring into and reporting upon the proposed county of Grow; filed March 21, 1895.

No. 148. Report of the Commissioners appointed under the act of April 17, 1878, entitled "An act to provide for the division of counties of this Commonwealth and the erection of new counties therefrom," for dividing Luzerne county and erecting a new county to be called Grow; filed May 20, 1895.

No. 149. Map of the proposed county of Grow, accompanying the report of the commissioners appointed to inquire into and report the said proposed county; filed May 20, 1895.

Miscellaneous Papers.

No. 32. A reference to city lots (Philadelphia), in connection with original purchasers; filed, 1895.

Copying of Old Records.

Reference has been made in previous reports to the act of 1833, which authorized the Surveyor General to employ his force, so far as possible, in the copying of old surveys and other documents. During the past year greater progress has been made in this work than during any previous year in the history of the department, there having been copied and bound 2,595 old surveys and 275 old surveys and certificates connected with seventeen certified townships of Luzerne county. The importance of pushing this work rapidly cannot be too strongly emphasized. For a number of years the Secretary of Internal Affairs has made recommendations to the Legislature on the subject, asking that appropriation be made for the employment of draughtsmen to do the work. During the session of 1895 partial provision was made for this object, and the results have been as before indicated. There are probably 100,000 surveys that ought to be copied, but with only the regular force of the department it would take many years to complete the work. With the additional help provided, however, great progress can be made, and it is expected that the results produced in 1896 will be still better than those of 1895. The entire department is a storehouse of valuable documents relating to the early history of the Commonwealth. In cases of litigation or disputes regarding titles to lands within the borders of the Commonwealth they are of inestimable value, and their care and preservation cannot be too strenuously insisted upon. It would be difficult to name a more important subject of legislation. In this connection it is proper to say that the building in which these records are stored is not fireproof, and

in the event of a fire of any considerable extent their partial destruction would seem inevitable. When the Legislature shall take action with reference to the building of a new capitol for the State, it is sincerely hoped that fireproof apartments will be provided for these valuable records.

Early Land Titles in Pennsylvania.

Several articles have been published in recent reports regarding the origin of land titles in Pennsylvania. In the report for 1892 a complete account was given of the titles to what are known as the Depreciation lands, lying in the western part of the State, north of the Ohio river. In 1893 a description was given of the Donation lands, or the lands which were given to the soldiers who participated in the war for American independence. These lands are located north and west of the Allegheny river and Conewago creek, in northwestern Pennsylvania. In the report for 1894, a fairly complete history was given of the earliest titles in Pennsylvania acquired from the Indians. In the present report we submit an article on "Virginia Title in Pennsylvania."

Boundary Lines and Boundary Line Monuments.

No examination of boundary lines or boundary line monuments has been made during the year covered by this report, but during the coming year efforts will be made to co-operate with the proper authorities of adjoining states in making the investigations which may seem necessary.

The law which required examinations to be made by the county commissioners of counties located along the State lines was repealed by the Legislature at its last session, and hereafter examinations will be made by appointments from this department.

STATE WEATHER SERVICE BUREAU.

In 1887 provision was made for the establishment of a State Weather Service Bureau, which was placed under the management of the Franklin Institute, of Philadelphia. Several appropriations have been made by the Legislature for defraying the expenses incident to the maintenance of the bureau, and details of officers to assist in the work have been made from year to year by the National Weather Service Bureau at Washington. The duties devolving upon the Department of Internal Affairs under the provisions of the act of 1889, in connection with this work, have been merely to commission local observers and pay the bills as certified and presented by the Franklin Institute. An item was placed in the general appropriation act of 1895, to provide for the maintenance of the bureau for the two years ending June 1, 1897, but the provision did not receive executive approval, and the bureau, although still in existence, is left without appropriation for its maintenance, so far as the State is concerned. Reports, however, are made out by the Franklin Institute each month, showing details of observations, and these reports, with other data, are published herewith. There seems to be a division of sentiment in the State as to the necessity for continuing this work. The observations, however, that are made regarding atmospheric pressure, temperature, humidity, rainfall and other meterological phenomena, as found to exist in different sections of the State, are undoubtedly of great value to scientists, and it must be admitted, even by those who have made but a partial study of the subject, that there is annually much data gathered and published of value and importance especially to the agriculturists of the Commonwealth. Whether provision will be made hereafter for the successful continuance of the bureau is a matter that rests, of course, in the hands of the lawmakers of the Commonwealth. The idea has been generally advanced that the bureau should be transferred to the Agricultural Department. Several years ago the National Bureau was transferred to the Agricultural Department at Washington, and, while we do not know what the result has been, there would seem to be some force in the argument. The subject is an important one and should receive proper attention, and such recommendations made in the way of legislation as will best conserve the interests of the people.

U. S. Department of Agriculture—Weather Bureau,
Office of the State Weather Service,
Philadelphia, Pa., December 13, 1895.

Mr. W. P. Tatham, Chairman Meteorological Committee, Franklin Institute, Philadelphia, Pa.:

Sir: I have the honor to submit the following report of the operations of the Pennsylvania State Weather Service during the year ending November 30, 1895. An average of fifty-six stations, from which full meteorological reports were received, and thirty additional rainfall stations were maintained. As in the past the records from these stations were carefully examined, compared and collated for publication.

They were published in the usual form in the Monthly Weather Review, and as a supplement in the Journal of the Franklin Institute, from January to May, inclusive. Since that time, owing to a lack of funds, caused by the vetoing of the appropriation for the maintenance of the service, the reports have been milliographed only.

While much inconvenience has been experienced from the lack of funds for printing monthly reports, weekly weather crop bulletins, the purchase and repair of meteorological instruments, the purchase of flags for the display of forecasts, frost and storm warnings and other incidental expenses for the proper conduct of the service, through the liberality of the chief of the U. S. Weather Bureau and the zeal of the voluntary observers, the service has been maintained and the continuity of the records preserved.

The display of weather and temperature signals have been maintained at about 100 stations. Since June 1st the flags necessary for this purpose have been furnished by the National service.

The logotype system of forecast distribution from post offices has been found popular and effective, and the distribution by this system is now large and comparatively inexpensive. The forecasts are telegraphed at government expense to selected post office centers, and the respective postmasters stamp the forecasts (by logotype) on addressed postal cards and mail them to adjacent offices, where they are posted for the benefit of the public.

Forecasts were also wired to the prominent railroad systems and displayed at their various stations.

The Weekly Weather Crop Bulletin was regularly published during the crop season by the milliograph process. The issue was necessarily limited, and consequently not as effective as more numerous printed copies would have been.

The thanks of the service are due to the Chief of the Weather Bureau for his liberal support, the voluntary observers and crop

correspondents for their continuous and commendable work in maintaining the service in its crippled condition, and to the press, telegraph, telephone and railroad companies for their many courtesies.

I enclose herewith copies of the monthly reviews from December, 1894, to November, 1895, inclusive, and a review of the weather conditions during the crop season of 1895.

I have also in preparation a tabulated report of the monthly temperatures and precipitation from each station since the establishment of the service, which will be completed as soon as the records are in hand for December, 1895, and which the honorable Secretary of Internal Affairs proposes to print in his coming annual report, and which in its concise form, will be convenient and valuable for reference.

Very respectfully,

T. F. TOWNSEND,

Observer in Charge.

Enclosures: Eleven monthly weather reviews; one review of weather and crop conditions.

Philadelphia, December 21, 1895.

To the Hon. James W. Latta, Secretary of Internal Affairs, Harrisburg, Pa.:

Sir: I have the honor to transmit the report of Captain T. F. Townsend, observer in charge, Pennsylvania State Weather Service, of the operations of the service for the year ending 30th November, last, and I have the honor to be

Your very obedient servant,

W. P. TATHAM,

Chairman Committee on Meteorology, Franklin Institute.

U. S. Department of Agriculture—Weather Bureau,

Office of the State Weather Service,

Philadelphia, Pa., November 30, 1895.

Review of the Weather and Crop Condition of the Season of 1895.

The departures of the monthly averages of temperature and precipitation are from the averages deduced from the records of the State Service for the past seven years.

January.

Average temperature, 24.2 degrees; deficiency, 4.4 degrees; average precipitation, 1.17 inches; excess, 0.70 degrees. Average snowfall, 14.2 inches; snow on ground at end of month, 10.7 inches.

February.

Average temperature, 20.2 degrees; deficiency, 9.8 degrees. Average precipitation, 1.22 inches; deficiency, 2.29 inches. With the exception of 1885, this was the coldest February in the past 20 years. The month was not only uniformly cold, but unusually low temperatures occurred. On the 6th, Emporium reported minus 26 degrees; Saegertown, minus 25 degrees; Smethport, minus 24 degrees, and Shingle House minus 23 degrees. The navigation of the Delaware river was practically closed for days to shipping. Many persons crossed the river on the ice between Philadelphia and Camden. Heavy drifting snows occurred on the 7th and 8th, blockading railroad trains and country roads. The total snowfall for the month was heavy in the northern portions of the State, and comparatively light in the southern portions. But little remained on the ground at the close of the month, outside of the remains of the heavy drifts.

March.

Average temperature, 33.8 degrees; deficiency, 1.8 degrees. Average precipitation, 2.31 inches; deficiency, 1.26 inches. From January 1st to March 31st the accumulated deficiency in daily mean temperature at Philadelphia was 328 degrees; at Erie, 419 degrees, and at Pittsburgh, 483 degrees.

For the same period the deficiency in precipitation in inches at Philadelphia was 1.23; Erie, 3.40, and at Pittsburgh, 3.08.

Zero temperatures occurred at a few stations. The month was 9.4 degrees colder than the corresponding month of 1894. General snows occurred on the 2d, 9th, 11th, 12th, 15th and 16th, but they were light and without drift. With the exception of the remains of heavy drifts, but little snow remained on ground at the close of the month. Grass and grain appeared to have wintered well, but all vegetation was backward, with but few signs of spring.

April.

Average temperature, 49.2 degrees; excess, 1.2 degrees. Average precipitation, 3.76 inches; excess, 0.48 inches.

From January 1st to April 30th the accumulated deficiency in daily mean temperature at Philadelphia was 298 degrees; at Erie, 422 degrees, and at Pittsburgh, 399 degrees.

For the same period the excess in precipitation in inches at Philadelphia was 2.05; and deficiency at Erie, 3.96, and at Pittsburgh, 3.09.

Low temperatures prevailed during the first half of the month and high temperatures during the latter. The rainfall was unequally divided, being in excess in the eastern portion of the State, and deficient in the western portion.

Only a few stations had snowfall in measurable quantities, with none on the ground at the end of the month, except the remains of drifts in the northern counties.

Owing to the absence of the usual amount of thawing and freezing, grass and grain wintered well, although in a few sections, wheat was somewhat injured by the heavy drifts of snow, and the fields presented a spotted appearance after the snow had disappeared.

By the middle of the month plowing, gardening and the seeding of oats, clover, tobacco and potatoes was fairly well advanced in the southeastern counties, and while the season was backward, conditions were generally favorable for farm work, and both plowing and seeding progressed steadily during the balance of the month, extending into the latter sections of the State.

Higher temperatures prevailed during the last week of the month, causing active growth and germination. A few oats were up. Some corn was planted and early fruits blossoming.

May.

Average temperature, 60.6 degrees; excess, 1.4 degrees. Average precipitation, 2.68 inches; deficiency, 2.90 inches.

From January 1st to May 31st the accumulated deficiency in daily mean temperature at Philadelphia was 295 degrees; at Erie, 327 degrees, and at Pittsburgh, 373 degrees.

For the same period the excess in precipitation in inches at Philadelphia was 0.80, and deficiency at Erie, 4.89, and at Pittsburgh, 4.49.

Excessive warmth and sunshine prevailed up to the 11th, causing unusual growth to all vegetation. Grain, grass, garden truck, vegetables and fruits, all well advanced and in fine condition. On the 12th-13th a severe frost occurred which did an immense amount of damage to grapes, badly injured other fruits and seriously affected the staple crops in many sections.

This was followed on the 17th by another and more extended damaging frost and freeze, which added additional injury to fruit, corn and early vegetables. Counties in the southeasterly portion of the State received less damage than others.

The temperature during the latter part of the month was below normal, with a damaging frost on the 22d. Vegetation made slow progress. At the end of the month the reported damage by frosts to corn, vegetables and fruit was considerable. Much corn had been replanted. Cut worms were plentiful and damaging to corn.

June.

Average temperature, 71.4 degrees; excess, 2.1 degrees. Average precipitation, 3.50 inches; deficiency, 0.46 inches.

From January 1st to June 30th the accumulated deficiency in daily mean temperature at Philadelphia was 226 degrees; at Erie, 220 degrees, and at Pittsburgh, 24 degrees.

For the same period the accumulated excess in precipitation in inches at Philadelphia was 0.65, and deficiency at Erie, 7.30, and at Pittsburgh, 5.87.

High temperatures occurred during the first week in June. This, together with a high percentage of sunshine was beneficial to most crops, and rapid growth was made except where moisture was deficient.

Wheat at this time was in bloom with favorable prospects. Corn had improved in color and growth, and most of the replanting was finished. Fruit prospects were improving. Vegetables were doing well, and the damaging effect of the frosts was fast disappearing.

By the middle of the month wheat was heading nicely, and most crops were making good progress, but more rain was needed in many sections, particularly for grass and vegetables. With the exception of a lack of rainfall in some localities, favorable conditions prevailed during the balance of the month. Grain developed rapidly, and some wheat and hay was harvested during the latter part of the month. Oats were generally reported in good condition, and the hay crop was fair to good. Pasturage was short in some places and the damage by potato bugs and cut worms quite prevalent.

July.

Average temperature, 69.1 degrees; deficiency, 1.9 degrees. Average precipitation, 3.24 inches; deficiency, 0.97 inches. The temperature was 4.7 below that of July, 1894.

From January 1st to July 31st the accumulated deficiency in daily mean temperature at Philadelphia was 312 degrees; at Erie, 348 degrees, and at Pittsburg, 361 degrees.

For the same period the deficiency in precipitation in inches at Philadelphia was 0.65; at Erie, 7.61, and at Pittsburgh, 8.61.

Well distributed showers occurred during the early part of the month which gave new life and vigor to the growing crops which were feeling the injurious effects of a lack of moisture. Corn, potatoes, oats and pastures were much improved and many of them made rapid advancement. Haying and harvesting progressed rapidly, and fair crops were secured in good condition. The early hay crop proved better than was expected.

During the middle portion of July both temperature and rainfall were below the average, and a few stations reported light frosts on the 10th, but they were not damaging. All vegetables made good progress, and the ripened crops of grain and grass were well cured

and housed. By the end of the month the wheat harvest was nearly over.

While the temperature and rainfall were generally below the average during the balance and last of the month, the percentage of sunshine was large, and most crops obtained good growth. Corn had reached the critical stage and with future favorable conditions, the prospects were flattering. The potato crop promised to be heavy. Vegetables were plentiful, and obtained rapid growth. The fruit crop was better than anticipated early in the season. Some plowing was being done for fall seeding. Buckwheat looked well.

August.

Average temperature, 72.3 degrees; excess, 2.9 degrees. Average precipitation 3.23 inches; deficiency, 1.23 inches. The temperature was 2.9 above that for August, 1894.

From January 1st to August 31st the accumulated deficiency in daily mean temperature at Philadelphia was 209 degrees; at Erie, 301 degrees, and at Pittsburgh, 280 degrees.

For the same period the deficiency in precipitation in inches at Philadelphia was 4.90; at Erie, 7.64, and at Pittsburgh, 7.72.

The highest recorded temperatures occurred on the 11th, and in some localities reached 100 degrees. The lowest were on the 22d, when a few stations reported 32 degrees.

While the rainfall for the month was apparently well distributed and timely it was generally of a local character, and the reports from districts that were unfavorably affected by droughty conditions were numerous.

Much of the oats was harvested during the early part of the month, and the yield was generally large. A large acreage of potatoes was reported as doing well. Pasturage, in many section, was somewhat short. General rains occurred on the 11th and 12th, which benefited the growing crops in most localities. The relief, however, was only temporary, and from that time up to the last of the month the rainfall was light, which, together with the excessive temperature and large percentage of sunshine, largely extended and intensified the unfavorable conditions that had prevailed in various counties, so that at the end of the month the drouth was general throughout the State, and was injuriously affecting the maturing of most growing crops, and caused corn, buckwheat, tobacco, vegetables and fruits to dry up and ripen prematurely. Pasturage became short, and in some sections stock had to be fed. Springs and streams were failing, and the ground was too dry for plowing. A frost on the 22d was slightly damaging to corn, tobacco, buckwheat and vine truck in a few localities.

September.

Average temperature, 67.8 degrees; excess, 5.1 degrees. Average precipitation, 1.71 inches; deficiency, 2.38 inches.

From January 1st to September 30th the accumulated deficiency in daily mean temperature at Philadelphia was 67 degrees; at Erie, 215 degrees, and at Pittsburgh, 134 degrees.

For the same period the deficiency in precipitation in inches at Philadelphia was 7.72; at Erie, 7.77, and at Pittsburg, 8.52.

The average total rainfall in the Delaware Basin for the month was (0.95) less than one inch.

Light frosts occurred on the 2d, but were not damaging. Local rains on the 7th, in the Susquehanna basin, and a few portions of the Delaware basin, improved the late lowland crops, but considerable corn, buckwheat and tobacco had already ripened prematurely and were harvested. Plowing was fairly well advanced by the middle of the month, and considerable seeding done. Quite a heavy frost occurred on the 15th, which injured some late corn, buckwheat and tobacco. Extremely hot and dry weather prevailed during the latter part of the month, which caused the remaining crops to ripen prematurely. In some sections seeding was delayed on account of the dryness of the soil. Many of the streams and springs were unusually low and some wells entirely dry.

October.

Average temperature, 47.3 degrees; deficiency, 2.9 degrees. Average precipitation, 1.99 inches; deficiency, 1.60 inches.

From January 1st to October 31st the accumulated deficiency in daily mean temperature at Philadelphia was 186 degrees; at Erie, 415 degrees, and at Pittsburgh, 304 degrees.

For the same period the deficiency in precipitation in inches at Philadelphia was 7.69; at Erie, 8.70, and at Pittsburgh, 10.04.

The average temperature for the month was 6.3 degrees below the corresponding month of 1894.

The long continued and injurious drought extended into October until the 12th and 13th, when the surface drought was practically broken in the Delaware basin, and in the eastern portions of the Susquehanna basin. Heavy rains occurrred again in these sections on the 31st. In the Ohio basin the drought continued throughout the entire month, the total rainfall for that section for October averaging only nine-tenths (0.90) of an inch.

For some time previous to the breaking of the drouth in the Delaware basin the water in the Delaware river was quite brackish at Philadelphia. Springs and streams throughout the State were never known to be lower, and a water famine existed in many sections.

Recapitulation.

The past season in many respects was a phenomenal one. The damaging frosts of spring and the injurious and extended droughty conditions during the latter growth and maturing of the crops, seemingly shut out all prospects for the crops that were finally obtained.

Grass and grain passed through the winter without receiving material damage, as the weather was uniformly cold and the ground fairly well protected by snow. An unusually late and backward spring prevailed, with but little signs of its approach until the latter part of April. Rapid growth prevailed from that time under most favorable conditions, until the 12th and 13th of May, when severe frosts occurred which apparently damaged tender crops, grapes and other fruits, to a large extent. This was followed on the 17th by another and more extended and damaging frost and freeze, which added additional injury to fruit, corn and early vegetables. This necessitated the replanting of a large area of corn, which caused it to be late in maturing. Many of the vegetables finally recovered from the injurious effects of the drouth, but fruits evidently received permanent injury, to which was later added to them, the injurious effect of the drouth. With the exception of local droughts the conditions were generally favorable for crops until the latter part of the season, when very many of them were shortened by premature ripening on account of the drouth which prevailed all over the State.

Notwithstanding these adverse conditions, the various unfavorable reports, and the anticipated failure by the agriculturists of nearly all fall crops, the expected shortage was not realized, and considered as a whole, excellent crops were secured, and in many instances they were second to none ever raised in the State.

This unexpected result may partly be accounted for from the fact that though the amount of rainfall was light, showers were fairly frequent, and the rainfall was absorbed and retained in the ground for the sustenance of the plants, instead of being rapidly carried off to only add volume to the streams. Besides there were many favored localities in which the growing conditions were uniformly good throughout the entire season, and where unusually large crops were secured which materially added to the aggregate productions of the State.

T. F. TOWNSEND,
Observer in Charge.

PENNSYLVANIA STATE WEATHER SERVICE.

[*Under the direction of the Franklin Institute.*]

Monthly Weather Review for December, 1894

Hall of the Franklin Institute,
Philadelphia, December 31, 1894.

General Review.

The average temperature for December, 1894, 32.4 degrees, is 0.4 degrees below the average (32.8 degrees) for the past seven years.

The highest recorded temperatures occurred on the 15th, 16th, 17th, 21st and 22d, and were as follows: Immel Reservoir, 66 degrees; Johnstown, 64 degrees; Pittsburgh, 62 degrees, and Smethport, 62 degrees.

The lowest were on the 29th and 30th: Wellsboro, minus 28 degrees; Shingle House, minus 25 degrees; Emporium, minus 18 degrees, and Towanda, minus 16 degrees.

From January 1, 1894, to December 31, 1894, the accumulated excess in daily mean temperature at Philadelphia was 459 degrees; at Erie, 709 degrees, and at Pittsburgh, 580 degrees.

For the same period the deficiency in precipitation, in inches, at Philadelphia, was 0.22; Erie, 7.55, and Pittsburgh, 9.31.

Temperature.

	Mean Temperature, Degrees.	Mean Precipitation, Inches
December, 1887,	31.5	3.53
1888,	32.6	3.14
1889,	39.3	2.77
1890,	27.5	3.97
1891,	38.6	4.09
1892,	27.9	1.69
1893,	32.1	3.06
1894,	32.4	3.95

The means of the daily maximum and minimum temperatures, 40.0 degrees and 24.9 degrees, respectively, give a monthly mean of 32.4 degrees, which is 0.3 above the corresponding month of 1893.

The average daily range was 15.1 degrees.

Highest monthly mean, 37.0, at Philadelphia Weather Bureau.

Lowest monthly mean, 24.7 degrees, at Selinsgrove.

Highest temperature recorded during the month, 66 degrees on the 17th at Immel Reservoir.

Lowest temperature, minus 28 degrees on the 29th at Wellsboro.

Greatest local monthly range, 86 degrees at Wellsboro.

Least local monthly range, 47 degrees at South Bethlehem.

Greatest daily range, 40 degrees at Drifton.

Precipitation.

The average precipitation for the State, for the month, 3.95 inches, is 0.77 inches more than the average (3.18) for the last seven years.

General rains prevailed on the 1st, 2d, 8th, 9th, 10th, 11th, 12th, and snow on the 25th, 26th and 27th.

The storm of the 26th was a mixture of snow and sleet, and caused considerable damage to telegraph and telephone lines.

Light snow occurred at a few stations on the 1st, 2d, 9th, 10th and 11th.

The largest monthly totals of snowfall in inches were: Shingle House, 22.5; Honesdale, 21.5; Somerset, 21.0; Lock Haven, 2.10.

An average of 8.7 inches for the State remained on ground at the end of the month.

The largest monthly totals of rainfall and melted snow in inches were: Confluence, 5.93; Somerset, 5.69; Quakertown, 5.33; Pottstown, 5.32; Uniontown, 5.19, and Immel Reservoir, 5.15.

The least were: Greenville, 2.27; Altoona, 2.30; Saegerstown, 2.39; Erie, 2.53; Chambersburg, 2.65, and Oil City, 2.65.

Wind and Weather.

The prevailing wind was from the west.

Average number: rainy days, 10; clear days, 10; fair days, 9; cloudy days, 12.

Barometer.

The mean pressure for the month, 30.15, is about .09 above the normal. At the United States Weather Bureau Stations, the highest observed was 30.52 at Pittsburgh on the 18th, and the lowest 29.25 at Philadelphia on the 27th.

Miscellaneous Phenomena.

Thunderstorms.—West Chester, 12th; Coatesville, 12th; Phoenixville, 12th.

Hail.—Emporium, 10th; West Chester, 26; Grampian, 10th; Easton, 26; Dyberry, 11th.

Snow.—Hamburg, 27th; Hollidaysburg, 27th; Towanda, 1st, 10th, 27th; Quakertown, 25th, 27th; Cassandria, 24th, 25th, 27th; Johnstown, 26th, 27th, 28th; Emporium, 10th, 26th, 27th; Mauch Chunk, 25th, 27th; State College, 10th, 25th, 26th, 27th; West Chester, 26th; Coatesville, 26th, 27; Phoenixville, 26th, 27th; Kennett Square, 26th, 27th; Westtown, 26th, 27th; Grampian, 26th, 27th; Lock Haven, 25th, 26th, 27th; Saegerstown, 27th; Carlisle, 10th, 24th, 27th; Uniontown, 26th, 27th; Huntingdon, 10th, 25th, 26th, 27th; Lebanon, 25th, 26th, 27th; Coopersburg, 25th, 26th, 27th; Drifton, 10th, 24th, 26th, 27th; Wilkes-Barre, 11th, 24th, 26th, 27th; Smethport, 27th; Greenville, 27th; Pottstown, 26th; South Bethlehem, 25th, 26th, 27th; Easton, 27th; Aqueduct, 24th, 26th, 27th; Philadelphia (Weather Bureau), 26th; (Centennial Avenue), 26th, 27th; Blooming Grove, 25th, 27th; Shingle House, 2d, 13th, 26th, 27th; Somerset, 26th, 27th; Wellsboro, 11th, 27th; Lewisburg, 9th, 25th, 27th; Dyberry, 1st, 2d, 9th, 11th, 25th, 27th; Honesdale, 1st, 11th, 25th, 27th; Salem Corners, 1st, 11th, 25th, 27th, 28th; South Eaton, 27th; York, 26th, 27th; Selinsgrove, 26th, 27th.

Sleet.—Hollidaysburg, 10th, 24th; Cassandria, 10th, 25th; Johnstown, 10th, 24th; Emporium, 10th; State College, 10th; Coatesville, 27th; Kennett Square, 26th, 27th; Westtown, 27th; Lock Haven, 10th; Lancaster, 26th; Lebanon, 10th; Coopersburg, 1st, 10th, 11th, 27th; Aqueduct, 10th; Philadelphia (Weather Bureau), 26th; Centennial Avenue), 26th, 27th; Somerset, 11th; Dyberry, 2d, 11th; Honesdale, 2d, 11th; York, 10th, 24th, 27th.

Coronae.—Lebanon, 7th, 12th, 15th; Philadelphia (Centennial Avenue), 14th; York, 7th.

Solar Halo.—Philadelphia (Weather Bureau), 16th, 24th, 26th; (Centennial Avenue), 24th, 26th; Somerset, 24th.

Lunar Halo.—Lebanon, 7th, 21st; Philadelphia (Weather Bureau) 7th, 19th; (Centennial Avenue), 7th.

Parhelias.—Towanda, 28th, 29th.

Precipitation During December, 1894.

Monthly Weather Review for January, 1895.

Hall of the Franklin Institute,
Philadelphia, January 31, 1895.

General Review.

The average temperature for January, 1895, 24.2 degrees, is 4.4 degrees below the average (28.6) for the past seven years.

Most of the highest recorded temperatures occurred on the 7th, 11th and 21st, and were as follows: Pittsburg, 58 degrees; Uniontown, 58 degrees; Lancaster, 57 degrees; Erie, 55 degrees; Philadelphia, 55 degrees, and Immel Reservoir, 55 degrees.

The lowest were on the 1st, 5th, 13th, 14th, 27th, 28th and 31st: Emporium, minus 17 degrees; Smethport, minus 16 degrees; Wellsboro, minus 16 degrees; Shingle House, minus 15 degrees; Lewisburg, minus 15 degrees, and Dyberry, minus 15 degrees.

From January 1, 1895, to January 31, 1895, the accumulated deficiency in daily mean temperature at Philadelphia was 48 degrees; at Erie, 70 degrees, and at Pittsburg, 83 degrees.

For the same period the excess in precipitation, in inches, at Philadelphia, was 1.15; Pittsburg, 0.93, and a deficiency at Erie of 0.01.

Temperature.

	Mean Temperature. Degrees.	Mean Precipitation. Inches.
January, 1888,	22.1	4.19
1889,	31.9	3.54
1890,	37.7	3.04
1891,	30.6	3.64
1892,	26.3	4.77
1893,	19.3	2.85
1894,	32.7	2.29
1895,	24.2	4.17

The means of the daily maximum and minimum temperatures, 32.8 degrees and 15.5 degrees respectively, give a monthly mean of 24.2 degrees, which is 8.5 degrees below the corresponding month of 1894.

The average daily range was 17.3 degrees.

Highest monthly mean, 30.8 at Philadelphia (Centennial Avenue).

Lowest monthly mean, 16.8 at Shingle House.

Highest temperature recorded during the month, 58 degrees, on the 21st at Pittsburg and Uniontown.

Lowest temperature, minus 17 degrees on the 31st at Emporium.

Greatest local monthly range, 65 degrees at Cassandria and Uniontown.

Least local monthly range, 41 degrees at Coopersburg.

Greatest daily range, 51 degrees, at Saegerstown.

Precipitation.

The average precipitation for the State, for the month, 4.17 inches, is 0.70 inches more than the average (3.47) for the last seven years.

General precipitation (mostly snow) occurred on the 6th, 7th, 8th, 9th, 10th, 11th, 13th, 16th, 21st, 22d, 26th and 29th.

The average snowfall during the month was 14.2 inches, and 10.7 inches remained on the ground at the end of the month,

The largest totals of snowfall in inches were: Somerset, 32; Lock Haven, 29; Grampian, 28; Cassandria, 27; Emporium, 26, and Wellsboro, 25.

The largest monthly totals of rainfall and melted snow in inches were: Somerset, 6.36; Smethport, 5.90; Hamburg, 5.82; Hollidaysburg, 5.74; Pottstown, 5.65, and Phoenixville, 5.47.

The least were: Shingle House, 1.83; Towanda, 1.95; South Eaton, 2.35; Dyberry, 2.95; Confluence, 2.98, and Chambersburg, 3.00.

Wind and Weather.

The prevailing wind was from the west.

Average number: rainy days, 13; clear days, 7; fair days, 10; cloudy days, 14.

Barometer.

The mean pressure for the month, 30.06, is about .04 below the normal. At the United States Weather Bureau Stations, the highest observed was 30.54, at Erie, on the 8th, and the lowest 29.24 at Erie on the 26th.

Miscellaneous Phenomena.

Thunderstorms. — Hollidaysburg, 5th; Johnstown, 6th; Mauch Chunk, 26th; Uniontown, 6th; Lebanon, 5th, 26th; South Bethlehem, 26th; Easton, 26th; Aqueduct, 6th; Somerset, 6th; Lewisburg, 6th.

Hail.—Towanda, 6th, 10th; Emporium, 6th, 10th; Mauch Chunk, 6th, 10th; Phoenixville, 6th, 25th; Grampian, 5th; Lock Haven, 6th, 10th; Carlisle, 6th; Lebanon, 5th, 10th, 16th; Easton, 6th, 16th; Dyberry, 6th, 26th.

Monthly Weather Review for February, 1895.

Hall of the Franklin Institute,
Philadelphia, February 28, 1895.

General Review.

The average temperature for February, 1895, 20.2 degrees, is 9.8 degrees below the average (30.0 degrees) for the past seven years.

The highest recorded temperatures occurred on the 27th and 28th, and were as follows: Pittsburg, 60 degrees; Altoona, 56 degrees; Chambersburg, 56 degrees, and Aqueduct (Logania), 56 degrees.

The lowest were on the 6th: Emporium, minus 26 degrees; Saegerstown, minus 25 degrees; Smethport, minus 24 degrees, and Shingle House, minus 23 degrees.

With the exception of 1885, this was the coldest February in the past twenty years. Not only were unusually low temperatures recorded on the 6th, but the month was uniformly cold. The navigation of the Delaware river was practically closed for days to shipping. By the assistance of the city ice boats the ferry boats were enabled to make irregular trips. Many persons crossed the river on the ice between Philadelphia and Camden.

From January 1, 1895, to February 28, 1895, the accumulated deficiency in daily mean temperature at Philadelphia was 302 degrees; at Erie, 328 degrees, and at Pittsburg, 395 degrees.

For the same period the deficiency in precipitation, in inches, at Philadelphia, was 0.69; Erie, 2.09, and at Pittsburg, 1.01.

Temperature.

	Mean Temperature. Degrees.	Mean Precipitation. Inches.
February, 1888, ...	28.4	2.50
1889, ...	23.0	1.96
1890, ...	37.1	4.32
1891, ...	34.9	4.61
1892, ...	31.7	1.75
1893, ...	27.4	5.92
1894, ...	27.6	3.53
1895, ...	20.2	1.22

The means of the daily maximum and minimum temperatures, 29.6 degrees, and 10.8 degrees, respectively, give a monthly mean of 20.2 degrees, which is 7.4 degrees below the corresponding month of 1894.

The average daily range was 18.8 degrees.

Highest monthly mean, 25.8 degrees, at Philadelphia (Centennial Avenue).

Lowest monthly mean, 13.6 degrees at Wellsboro.

Highest temperature recorded during the month, 60 degrees, on the 28th, at Pittsburg.

Lowest temperature, minus 26 degrees, on the 6th, at Emporium.

Greatest local monthly range, 75 degrees, at Emporium.

Least local monthly range, 54 degrees at South Bethlehem and Wilkes-Barre.

Greatest daily range, 55 degrees at Saegerstown.

Precipitation.

The average precipitation for the State, for the month, 1.22 inches, is 2.29 inches less than the average (3.51) for the past seven years.

General snows occurred on the 2d, 7th, 8th, 13th and 21st. Those of the 7th and 8th were heavy, and being accompanied by high winds and low temperatures, the snow drifted badly. Railroad trains were either completely blocked or much delayed, and many country roads rendered impassable for days.

Rain occurred on the 28th, and was the only rainstorm during the month.

The largest monthly totals of snowfall in inches were: Coatesville, 28.2; Blooming Grove, 26.0; Drifton, 25.8, and Kennett Square, 21.2.

But little remained on ground at the end of the month, and this was in patches, being the remains of the heavy drifts.

The largest monthly totals of rainfall and melted snow in inches were: Blooming Grove, 3.47; Coatesville, 2.93; Stoyestown, 2.60; Drifton, 2.58; Saegerstown, 2.38, and Wilkes-Barre, 2.32.

The least were: Altoona, 0.17; State College, 0.22; Huntingdon, 0.46; Davis Island Dam, 0.46; Elwood Junction, 0.47; Emporium, 0.50, and Towanda, 0.50.

Wind and Weather.

The prevailing wind was from the northwest.

Average number: rainy days, 6; clear days, 10; fair days, 10; cloudy days, 8.

Barometer.

The mean pressure for the month, 30.07, is about .03 below the normal. At the United States Weather Bureau Stations, the highest observed was 30.57, at Harrisburg on the 24th, and the lowest 29.30, at Philadelphia on the 7th.

Miscellaneous Phenomena.

Snow.—Hamburg, 2d, 7th, 21st; Altoona, 1st, 8th, 21st, 28th; Hollidaysburg, 7th, 8th, 13th, 21st, 28th; Le Roy, 3d, 5th, 8th, 9th, 10th,

11th 14th, 20th, 21st; Towanda, 7th, 8th, 13th; Quakertown, 2d, 4th, 8th, 13th, 21st, 23d; Cassandria, 2d, 4th, 8th, 13th, 21st, 23d; Emporium, 7th, 8th, 21st; East Mauch Chunk, 2d, 7th, 8th, 13th, 21st; State College, 2d, 7th; West Chester, 2d, 7th, 8th, 13th, 21st; Coatesville, 2d, 7th, 8th, 13th, 21st, 23d; Kennett Square, 2d, 4th, 7th, 8th, 13th, 21st; Phoenixville, 2d, 7th, 8th; Westtown, 2d, 7th, 8th, 21st; Grampian, 4th, 7th, 8th, 13th, 14th, 18th, 20th, 23d; Lock Haven, 7th, 8th, 13th, 21st; Saegerstown, 7th, 8th, 13th, 19th, 20th, 21st; Carlisle, 3d, 8th, 9th; Uniontown, 7th, 8th, 9th, 12th, 13th; Chambersburg, 7th, 8th, 13th; Huntingdon, 2d, 6th, 13th; Lancaster, 2d, 7th, 8th, 13th; Lebanon, 2d, 4th, 7th, 8th, 13th, 21st, 23d; Coopersburg, 2d, 7th, 8th, 13th, 21st, 23d; Drifton, 2d, 3d, 7th, 8th, 13th, 14th, 21st, 25th; Wilkes-Barre, 2d, 4th, 7th, 8th, 9th, 21st; Williamsport, 7th, 8th, 13th, 23d; Smethport, 8th, 9th, 21st; Greenville, 9th, 18th, 19th; Pottstown, 2d, 7th, 13th 21st; South Bethlehem, 2d, 4th, 7th, 8th, 13th, 21st; Easton, 2d, 4th, 7th, 8th, 13th, 21st; Aqueduct, 2d, 7th, 13th, 21st; Philadelphia (Centennial Avenue), 2d, 4th, 7th, 8th, 13th, 21st, 23d; Blooming Grove, 2d, 7th, 8th, 9th, 13th, 21st; Shingle House, 8th, 9th, 24th; Selinsgrove, 2d, 7th, 8th, 13th, 23d; Somerset, 6th, 7th, 8th, 9th, 13th, 21st; Wellsboro, 7th, 8th, 18th, 21st; Lewisburg, 7th, 8th, 21st, 23d; Dyberry, 2d, 4th, 7th, 8th, 21st; Honesdale, 2d, 4th, 7th, 8th, 13th, 21st; Salem Corners, 2d, 4th, 5th, 8th, 13th, 21st, 22d; South Eaton, 7th, 8th; York, 2d, 7th, 8th, 13th, 21st.

Aurora.—Le Roy, 14th, 15th, 23d; Saegerstown, 15th, 23; Dyberry, 15th, 23d.

Solar Halo.—Le Roy, 12th, 27th; Towanda, 12th, 20th; South Bethlehem, 7th; Philadelphia (Weather Bureau), 1st 3d, 6th, 12th; (Centennial Avenue), 1st, 6th, 12th, 19th, 27th; Wellsboro, 12th.

Lunar Halo.—Le Roy, 3d, 6th; Towanda, 3d, 6th; Emporium, 7th; West Chester, 1st, 6th; Phoenixville, 6th; Lebanon, 1st, 6th; Philadelphia (Weather Bureau, 1st, 3d, 6th, 12th; (Centennial Avenue), 1st, 3d, 6th; Wellsboro, 3d; Lewisburg, 6th.

Precipitation During February, 1895.

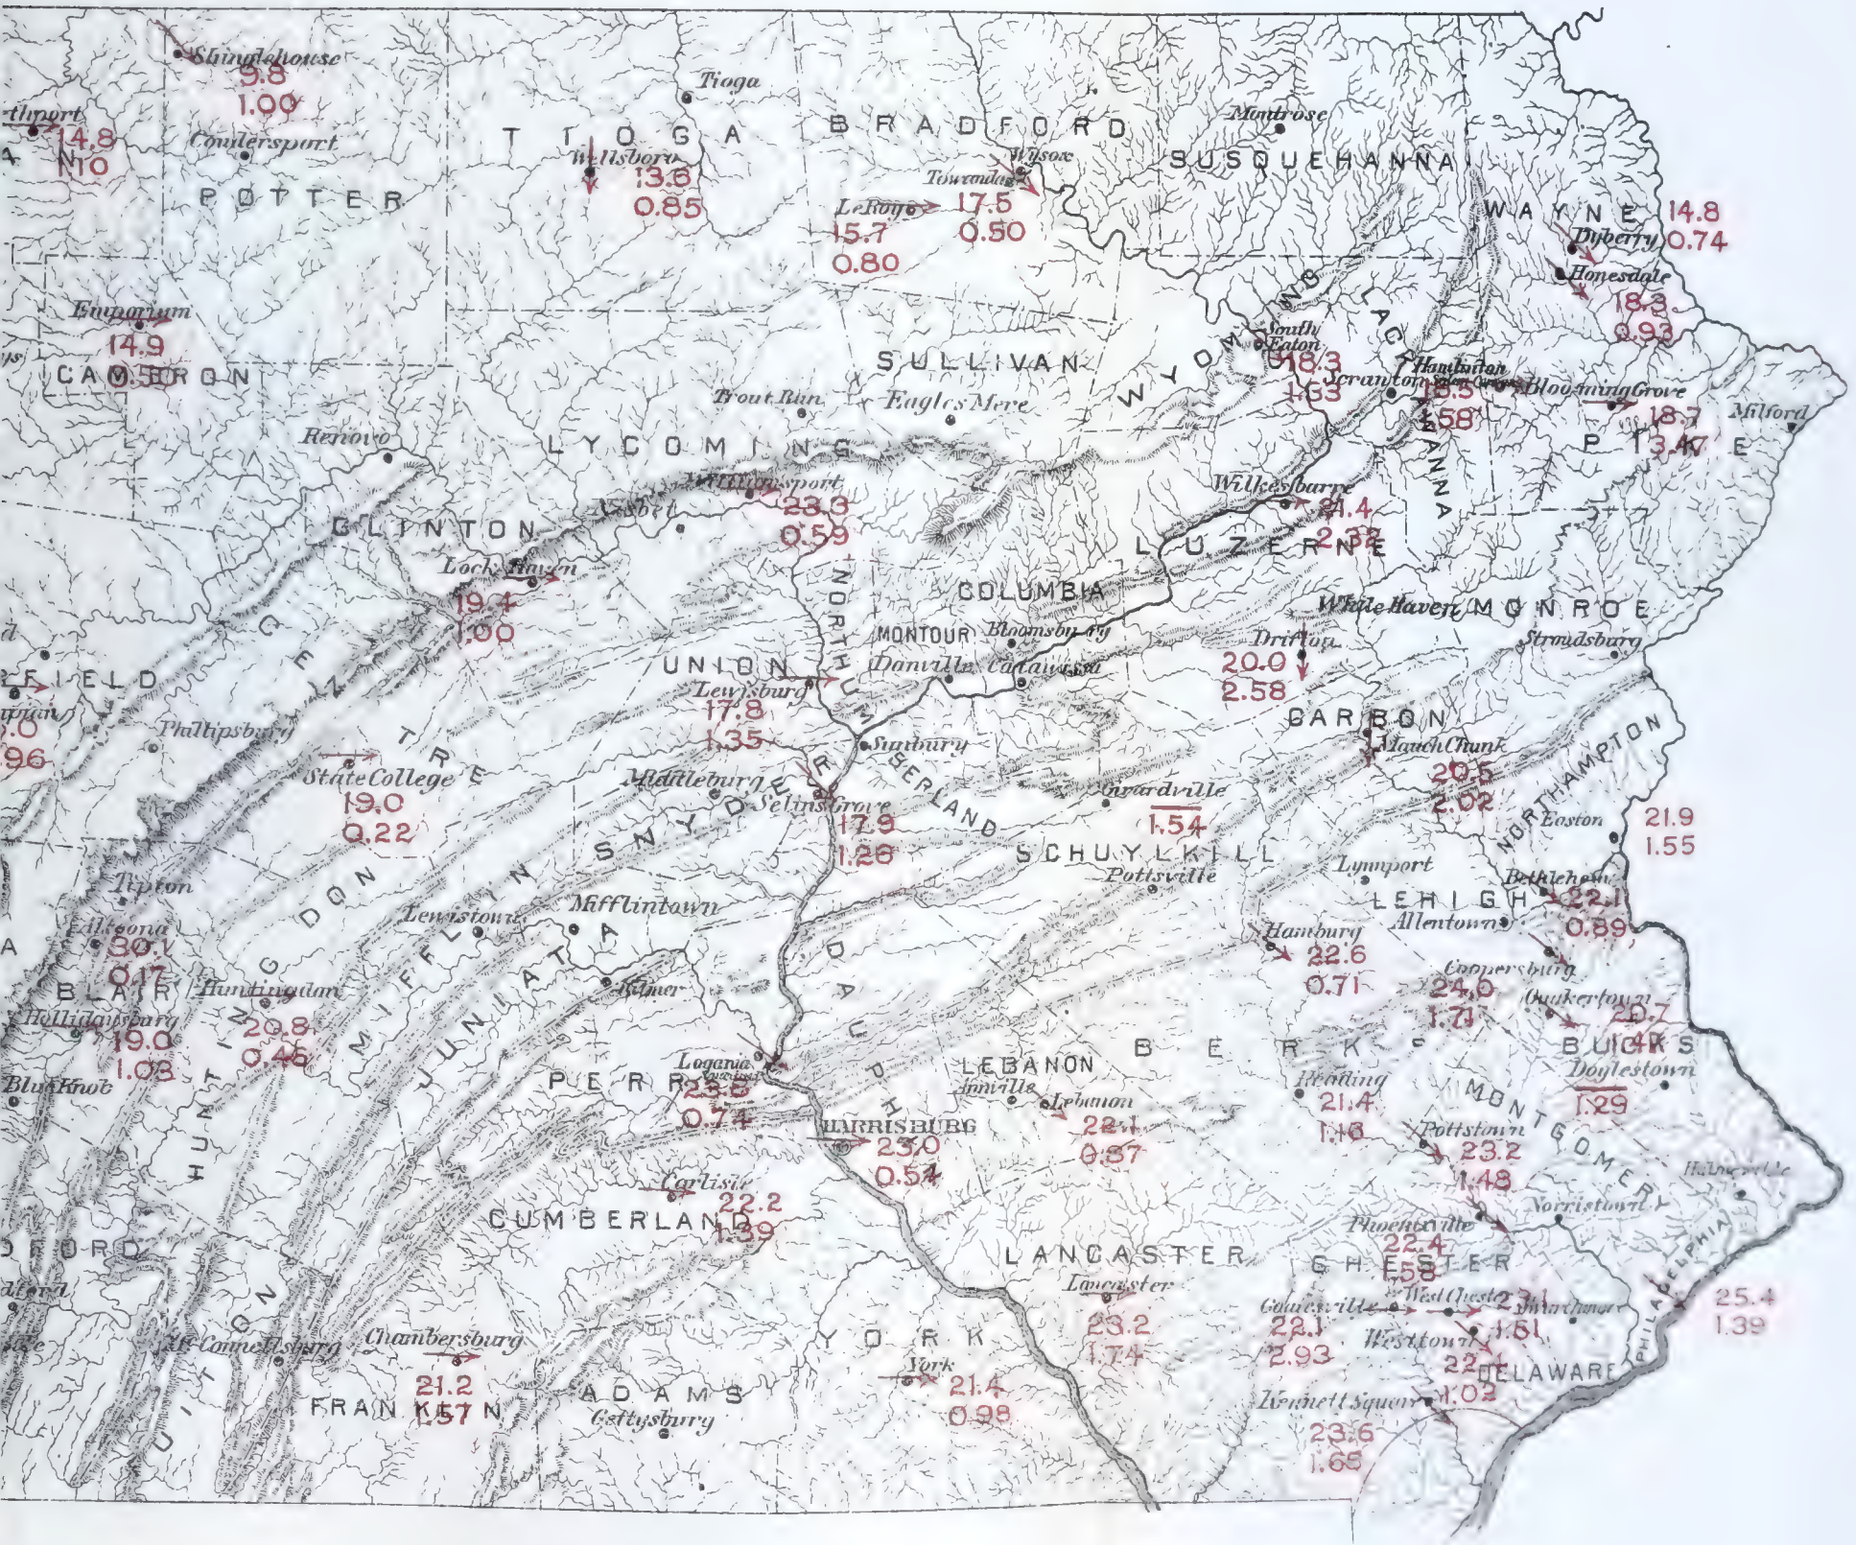
URE, RAINFALL AND PREVAILING WIND DIRECTION FOR FEBRUARY, 1895.



Monthly Weather Review for March, 1895.

Hall of the Franklin Institute,
Philadelphia, March 31, 1895.

General Review.

The average temperature for March, 1895, 33.8 degrees, is 1.5 degrees below the average (35.3 degrees) for the past seven years.

The highest recorded temperatures occurred on the 1st, 24th, 25th and 31st, and were as follows: Coatesville, 70 degrees; Uniontown, 68 degrees; Lancaster, 67 degrees; Pottstown, 67 degrees, and Lycippus, 67 degrees.

The lowest were on the 3d, 5th, 14th and 15th: Wellsboro, minus 4 degrees; Smethport, 1 degree; Shingle House, 1 degree, and Edinboro, 1 degree.

At the close of the month, grain and grass appear to have wintered well, but all vegetation is backward, with but few signs of spring.

From January 1, 1895, to March 31, 1895, the accumulated deficiency in daily mean temperature at Philadelphia was 328 degrees; at Erie, 419 degrees, and at Pittsburg, 483 degrees.

For the same period the deficiency in precipitation, in inches, at Philadelphia, was 1.23; Erie, 3.40, and at Pittsburg, 3.08.

Temperature.

		Mean Temperature, Degrees.	Mean Precipitation, Inches.
March,	1888,	31.1	3.55
	1889,	38.9	2.90
	1890,	33.4	5.15
	1891,	34.1	5.10
	1892,	32.0	4.14
	1893,	34.7	2.52
	1894,	43.2	1.63
	1895,	33.8	2.31

The means of the daily maximum and minimum temperatures, 42.9 degrees and 24.8 degrees, respectively, give a monthly mean of 33.8 degrees, which is 9.4 degrees below the corresponding month of 1894.

The average daily range was 18.1 degrees.

Highest monthly mean, 39.3 degrees at Philadelphia (Centennial Avenue).

Lowest monthly mean, 26.6 degrees at Leroy and Wellsboro.

Highest temperature recorded during the month, 70 degrees on the 1st at Coatesville.

Lowest temperature, minus 4 degrees on the 3d at Wellsboro.
Greatest local monthly range, 63 degrees at Shingle House.
Least local monthly range, 40 degrees at South Bethlehem.
Greatest daily range, 55 degrees at Drifton.

Precipitation.

The average precipitation for the State, for the month, 2.31 inches, is 1.26 inches less than the average (3.57) for the past seven years.

General snows occurred on the 2d, 9th, 11th, 12th, 15th and 16th, but they were mostly light and without drift. Most of the snow remaining on ground at the end of the month, was the remains of the heavy drifts in February.

The heaviest snowfall totals in inches for the month were: Cassandria, 22.0; Somerset, 20.5; Wellsboro, 18.0, and Salem Corners, 12.6.

The largest totals of rainfall and melted snow in inches were: Confluence, 4.03; Uniontown, 3.86; Carlisle, 3.67; Stoyestown, 3.66; Phoenixville, 3.61; Pottstown, 3.57, and Forks of Neshaminy, 3.51.

The least were: Elwood Junction, 0.99; State College, 1.03; Altoona, 1.05; Saegerstown, 1.14; Williamsport, 1.16, and Towanda, 1.28.

Wind and Weather.

The prevailing wind was from the nortwest.

Average number: rainy days, 11; clear days, 10; fair days, 10; cloudy days, 11.

Barometer.

The mean pressure for the month, 30.04, is about .02 above the normal. At the United States Weather Bureau Stations, the highest observed was 30.65, at Harrisburg on the 23d, and the lowest 29.44, at Erie on the 1st.

Miscellaneous Phenomena.

Thunderstorms.—Hollidaysburg, 25th, 26th; Le Roy, 25th; Towanda, 25th; Quakertown, 25th; Cassandria, 25th, 27th; Emporium, 25th; East Mauch Chunk, 25th; State College, 27th; West Chester, 25th; Coatesville, 25th; Kennett Square, 25th; Phoenixville, 25th; Lock Haven, 25th, 27th; Uniontown, 27th; Huntingdon, 25th; Coopersburg, 25th; Williamsport, 8th, 25th, 31st; Smethport, 25th; Pottstown, 25th; South Bethlehem, 25th; Easton, 25th; Logania, 9th, 25th; Selinsgrove, 9th, 25th, 27th, 28th; Somerset, 25th, 27th; Wellsboro, 25th; Lewisburg, 24th, 28th, 31st; Dyberry, 25th; Hamlinton, 25th; South Eaton, 25th.

Hail.—Gettysburg, 15th; Towanda, 30th; Kennett Square, 9th, 15th; Phoenixville, 14th, 15th; Wilkes-Barre, 30th; South Bethlehem, 15th; Logania, 25th; Blooming Grove, 30th, 30th; Selinsgrove, 28th; Dyberry, 13th 15th; Honesdale, 30th; Hamlinton, 15th; York, 15th.

Snow.—Gettysburg, 2d, 11th, 15th, 16th; Hamburg, 2d, 9th, 11th, 12th; Hollidaysburg, 2d, 11th, 12th, 15th, 16th, 18th, 24th; Le Roy, 2d, 4th, 6th, 9th, 15th, 26th, 27th; Towanda, 2d, 6th, 15th, 26th; Quakertown, 2d, 15th, 16th; Cassandria, 2d, 6th, 9th, 12th, 14th, 15th, 16th, 17th, 18th, 26th; Emporium, 2d, 4th, 6th, 7th, 9th, 15th, 16th, 24th; East Mauch Chunk, 3d, 9th, 12th, 15th, 16th; State College, 2d, 9th, 15th, 16th, 18th, 24th; West Chester, 11th; Coatesville, 2d, 9th, 11th, 15th, 16th; Kennett Square, 1st, 11th, 15th; Phoenixville, 2d, 11th, 15th; Grampian, 2d, 4th, 6th, 7th, 9th, 12th, 15th, 16th, 24th; Lock Haven, 2d, 6th, 9th, 13th, 14th, 15th, 16th, 24th; Carlisle, 11th, 15th, 16th, 24th; Uniontown, 2d, 8th, 16th; Huntingdon, 2d, 11th, 15th, 24th; Lancaster, 2d, 11th, 12th, 13th, 14th, 15th, 16th; Lebanon, 2d, 9th, 11th, 12th, 15th, 16th, 24th; Coopersburg, 2d, 9th, 15th, 16th; White Haven, 2d, 7th, 9th, 28th; Wilkes-Barre, 2d, 9th, 12th, 15th; Williamsport, 2d, 6th, 8th, 16th; Smethport, 4th, 6th, 7th, 16th, 24th, 26th; Pottstown, 2d, 9th, 11th, 14th, 15th; South Bethlehem, 2d, 9th, 12th, 15th, 16th; Easton, 2d, 9th, 16th; Logania, 2d, 9th, 11th, 14th, 15th, 24th; Philadelphia (Centennial Avenue), 2d, 9th, 11th, 15th, 26th; Blooming Grove, 2d, 6th; Shingle House, 4th, 6th, 7th, 15th, 24th, 25th, 26th, 27th; Selingsgrove, 2d, 9th, 12th, 15th, 16th; Somerset, 2d, 8th, 10th, 14th, 15th, 17th, 18th, 24th, 26th; Wellsboro, 2d, 4th, 6th, 9th, 11th, 15th; Lewisburg, 2d, 9th, 11th, 15th, 16th, 24th; Dyberry, 2d, 4th, 6th, 12th, 13th, 15th, 26th, 28th; Honesdale, 2d, 6th, 12th, 15th, 26th; Hamlinton, 2d, 4th, 6th, 9th, 12th, 15th, 16th, 24th, 26th; Lycippus, 2d, 8th, 9th, 15th, 18th, 27th; South Eaton, 2d, 9th, 15th; York, 2d, 9th, 11th, 15th, 16th, 24th, 26th.

Sleet.—Gettysburg, 15th, 24th; Hollidaysburg, 15th; Towanda, 30th; Quakertown, 2d, 15th, 30th; Coatesville, 15th; Kennett Square, 12th, 15th; Lock Haven, 4th; Huntingdon, 15th; Lancaster, 15th; Lebanon, 25th; Coopersburg, 15th; White Haven, 15th; Easton, 15th; Logania, 9th, 14th, 15th, 29th; Philadelphia (Centennial Avenue), 2d, 15th, 29th; Selingsgrove, 15th; Dyberry, 13th, 15th; Honesdale, 12th, 13th.

Coronae.—Towanda, 3d, 8th.

Solar Halo.—Philadelphia (Weather Bureau), 27th; (Centennial Avenue), 21st, 24th, 27th; Wellsboro, 20th.

Lunar Halo.—Towanda, 3d.

Parhelias.—Le Roy, 31st; Towanda, 11th.

Precipitation During March, 1895.

Monthly Weather Review for April, 1895.

Hall of the Franklin Institute,
Philadelphia, April 30, 1895.

General Review.

The average temperature for April, 1895, 49.2 degrees, is 1.2 degrees above the average (48.0 degrees) for the past seven years.

The highest recorded temperatures occurred on the 25th and were as follows: Aqueduct, Logania, 90 degrees; Lock Haven, 88 degrees; Carlisle, 87 degrees; Coatesville, 87 degrees, and Pottstown, 87 degrees.

The lowest were on the 4th and 11th: Shingle House, 5 degrees; Saegerstown, 17 degrees; Dyberry, 18 degrees, and Smethport 18 degrees.

At the close of the month, grain and grass were in good condition, but had made slow growth and all vegetation continued unusually late and backward.

From January 1, 1895, to April 30, 1895, the accumulated deficiency in daily mean temperature, at Philadelphia was 298 degrees; at Erie, 422 degrees, and at Pittsburg, 399 degrees.

For the same period the excess in precipitation, in inches, at Philadelphia, was 2.05, and deficiency at Erie 3.96, and at Pittsburg, 3.09.

Temperature.

	Mean Temperature, Degrees.	Mean Precipitation, Inches.
April, 1888,	46.5	2.52
1889,	48.7	4.50
1890,	48.7	3.46
1891,	49.8	2.08
1892,	47.0	2.04
1893,	47.6	4.74
1894,	48.0	3.62
1895,	49.2	3.76

The means of the daily maximum and minimum temperatures, 59.8 degrees and 38.7 degrees, respectively, give a monthly mean of 49.2 degrees, which is 1.2 degrees above the corresponding month of 1894.

The average daily range was 21.1 degrees.

Highest monthly mean, 54.0 degrees, at Pittsburg.

Lowest monthly mean, 42.7 degrees, at Wellsboro.

Highest temperature recorded during the month, 90 degrees, on the 25th at Aqueduct, Logania.

Lowest temperature, 5 degrees, on the 4th at Shingle House.

Greatest local monthly range, 73 degrees, at Shingle House.

Least local monthly range, 52 degrees at Easton and Philadelphia (Weather Bureau).

Greatest daily range, 49 degrees, at Drifton.

Precipitation.

The average precipitation for the State, for the month, 3.76 inches, is 0.48 inches more than the average (3.28) for the past seven years.

Only a few stations had snowfall in measurable quantities.

General rains occurred on the 1st, 2d, 8th, 9th, 13th, 22d, 27th, 29th and 30th.

The largest monthly totals of rainfall and melted snow in inches were: Seisholtzville, 7.09; Hamburg, 6.85; East Mauch Chunk, 6.32; Philadelphia (Weather Bureau), 6.14; Forks of Neshaminy, 6.04, and Point Pleasant, 5.99.

The least were: Lock Haven, 0.79; Beaver Dam, 1.29; Saegerstown, 1.40; Elwood Junction, 1.66; Towanda, 1.70, and Davis Island Dam, 1.80.

Wind and Weather.

The prevailing wind was from the northwest.

Average number: rainy days, 10; clear days, 10; fair days, 8; cloudy days, 12.

Barometer.

The mean pressure for the month, 30.04, is about .04 above the normal. At the United States Weather Bureau Stations, the highest observed was 30.67, at Philadelphia on the 12th, and the lowest 29.36, at Philadelphia, on the 9th.

Miscellaneous Phenomena.

Thunderstorms.—Gettysburg, 13th; Le Roy, 25th; Towanda, 25th, 27th, 29th; East Mauch Chunk, 26th; State College, 26th; Grampian, 13th; Uniontown, 13th, 14th; Coopersburg, 1st; White Haven, 27th; Wilkes-Barre, 26th; Easton, 9th; Blooming Grove, 9th; Lewisburg, 27th; Dyberry, 9th, 25th, 27th; Honesdale, 9th, 27th; South Eaton, 9th, 25th, 27th.

Hail.—Gettysburg, 13th; Le Roy, 13th; State College, 13th; Uniontown, 13th; Easton, 2d, Dyberry, 1st.

Snow.—Le Roy, 3d, 15th; Grampian, 2d; Drifton, 2d; Coopersburg, 3d; Smethport, 2d; Blooming Grove, 2d; Dyberry, 2d, 3d; Honesdale, 2d, 3d.

Frost.—Hollidaysburg, 3d, 4th, 11th, 14th, 18th, 19th; Towanda, 18th, 19th, 20th, 24th; Quakertown, 4th, 5th, 18th, 21st, 23d, 24th; Cassandria, 10th, 11th, 14th, 18th, 19th; Emporium, 5th, 11th, 18th, 19th, 20th, 24th; East Mauch Chunk, 5th, 18th, 19th; State College, 18th, 19th, 24th; Sagerstown, 17th, 18th, 19th, 21st, 24th; Uniontown, 3d, 10th, 11th, 19th, 20th, 21st, 24th; Lebanon, 5th, 12th; Williamsport, 18th, 24th; Pottstown, 4th, 5th, 11th, 12th, 18th; South Bethlehem, 3d, 4th, 5th, 11th, 12th, 18th; Easton, 5th, 18th, 19th, 24th; Logania, 18th, 19th; Philadelphia (Weather Bureau), 18th; (Centennial Avenue), 11th, 18th, 21st, 24th; Blooming Grove, 18th, 19th, 23d, 24th; Selingsgrove, 4th; Somerset, 24th; Wellsboro, 2d, 3d, 4th, 5th, 10th, 11th, 12th, 18th, 19th, 20th, 23d, 24th; Dyberry, 1st, 6th, 11th, 12th, 16th, 17th, 18th, 19th, 20th, 21st, 23d, 24th; South Eaton 4th, 5th, 6th, 18th, 24th; York, 4th, 19th.

Aurora.—Le Roy, 11th, 19th; Saegerstown, 10th.

Solar Halo.—Le Roy, 12th; Philadelphia (Centennial Avenue), 6th, 12th, 17th, 22d; Wellsboro, 12th.

Lunar Halo.—Towanda, 5th; Philadelphia (Centennial Avenue), 6th; Wellsboro, 5th.

Parhelias.—Saegerstown, 5th.

Precipitation During April, 1895.

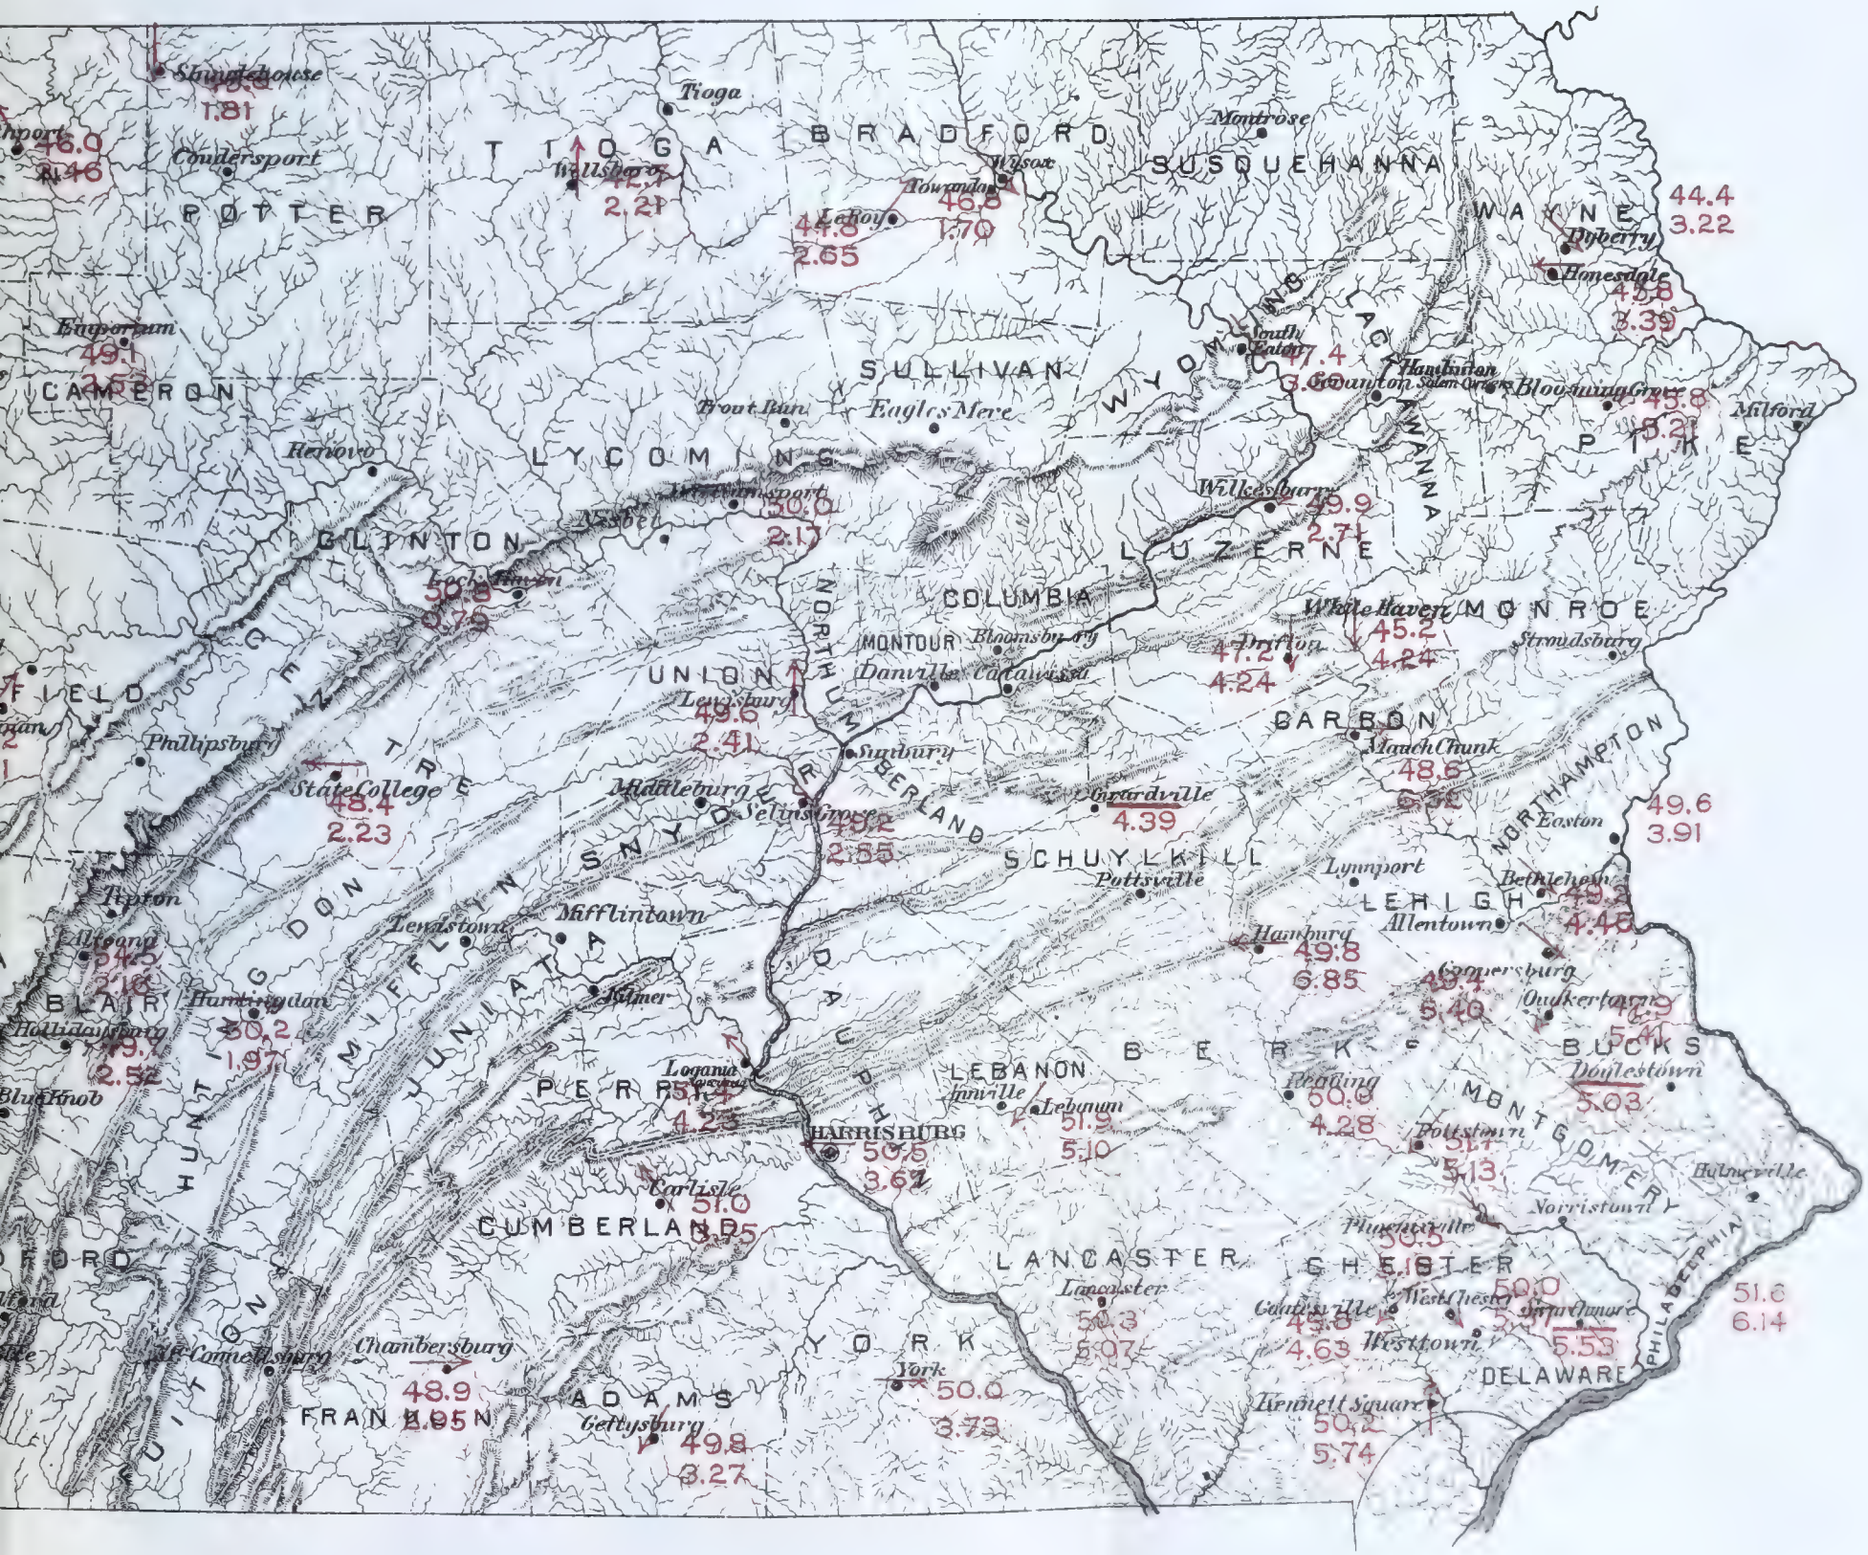
URE, RAINFALL AND PREVAILING WIND DIRECTION FOR APRIL 1895.



Monthly Weather Review for May, 1895.

Hall of the Franklin Institute,
Philadelphia, May 31, 1895.

General Review.

The average temperature for May, 1895, 60.6 degrees, is 1.4 degrees above the average (59.2 degrees) for the past seven years.

The highest recorded temperatures occurred on the 30th and 31st, and were as follows: Hollidaysburg, 110 degrees; Lock Haven, 102 degrees; Logania, 101 degrees, and Carlisle, 100 degrees.

The lowest were on the 17th: Smethport, 22 degrees; Shingle House, 23 degrees; Saegerstown, 24 degrees; Wellsboro, 24 degrees, and Dyberry, 24 degrees.

High temperatures prevailed until the 11th, causing rapid growth to vegetation. On the night of the 12th-13th a sever frost occurred, which killed the greater portion of the grape crop and badly injured other fruits. This was followed on the 17th by another damaging frost and freeze, which added additional injury to fruit, corn and early vegetables. Damaging frosts occurred again on the 21st, 22d and 23d. Unusually high temperatures occurred during the balance of the month.

From January 1, 1895, to May 31, 1895, the accumulated deficiency in daily mean temperature at Philadelphia was 295 degrees; at Erie, 327 degrees, and at Pittsburg, 373 degrees.

For the same period the excess in precipitation, in inches, at Philadelphia, was 0.80, and deficiency at Erie, 4.89, and at Pittsburg, 4.49.

Temperature.

	Mean Temperature, Degrees.	Mean Precipitation, Inches.
May, 1888,	57.6	4.24
1889,	62.0	5.91
1890,	58.8	6.71
1891,	57.5	2.12
1892,	59.5	5.70
1893,	58.0	5.54
1894,	60.8	8.88
1895,	60.6	2.68

The means of the daily maximum and minimum temperatures, 72.5 degrees and 48.6 degrees, respectively, give a monthly mean of 60.6 degrees, which is 0.2 degrees below the corresponding month of 1894.

The average daily range was 23.9 degrees.

Highest monthly mean, 63.6 degrees at Immel Reservoir (Lycippus) and Pottstown.

Lowest monthly mean, 56.6 degrees at Shingle House.

Highest temperature recorded during the month, 110 degrees on the 30th, at Hollidaysburg.

Lowest temperature, 22 degrees on the 7th, at Smethport.

Greatest local monthly range, 85 degrees, at Hollidaysburg.

Least local monthly range, 53 degrees at Erie.

Greatest daily range, 52 degrees, at Wilkes-Barre.

Precipitation.

The average precipitation for the State, for the month, 2.68 inches, is 2.90 inches less than the average (5.58) for the past seven years.

The rainfall was generally well distributed and timely.

The largest monthly totals of rainfall in inches were: Wellsboro, 6.46; Cassandria, 4.66; Oil City, 4.22; Wilkes-Barre, 4.16; Pottstown, 3.89; and Frederick, 3.76.

The least were: Altoona, 0.86; Beaver Dam, 1.19; Immel Reservoir (Lycippus), 1.34; Greensboro, 1.55; Stoyestown, 1.70, and Brookville, 1.71.

Wind and Weather.

The prevailing wind was from the west.

Average number: rainy days, 9; clear days, 13; fair days, 10; cloudy days, 8.

Barometer.

The mean pressure for the month, 30.07, is about .07 above the normal. At the United States Weather Bureau Stations, the highest observed was 30.36 at Philadelphia on the 1st, and the lowest, 29.61 at Harrisburg, on the 11th and Erie on the 26th.

Miscellaneous Phenomena.

Thunderstorms.—Hollidaysburg, 7th, 8th, 11th, 26th; Le Roy, 7th, 8th, 11th; Towanda, 7th, 8th, 11th; Quakertown, 27th; Cassandria, 7th, 26th; Johnstown, 7th, 8th, 11th; Emporium, 7th, 8th, 26th; East Mauch Chunk, 8th; State College, 7th, 11th, 19th; Coatesville, 27th; Kennett Square, 27th; Westtown, 27th; Lock Haven, 4th, 7th, 8th, 11th, 27th; Saegerstown, 6th, 7th, 11th; Harrisburg, 8th, 11th; Uniontown, 6th, 7th; Huntingdon, 5th, 9th, 10th; Lebanon, 8th, 31st; Coopersburg, 11th, 27th; White Haven, 8th, 11th; Wilkes-Barre, 31st; Williamsport, 7th, 8th, 11th, 31st; Easton, 31st; Aqueduct, Logania, 8th, 11th; Philadelphia (Weather Bureau), 27th; (Centennial

Avenue), 27th; Blooming Grove, 8th, 11th; Somerset, 7th, 11th; Lewisburg, 8th, 11th; Dyberry, 8th, 11th, 31st; Honesdale, 8th, 25th, 31st; Salem Corners (Hamlinton), 8th, 11th; South Eaton, 8th, 11th.

Hail.—Lock Haven, 4th; Williamsport, 12th.

Frost.—Gettysburg, 13th, 17th; Pittsburgh, 13th, 17th, 20th, 21st, 22d; Hollidaysburg, 13th, 17th, 20th, 22d; Le Roy, 13th, 16th, 17th, 20th, 21st, 22d; Towanda, 16th, 17th, 22d; Forks of Neshaminy, 17th; Quakertown, 16th, 17th, 22d, 23d; Cassandria, 14th, 15th, 17th, 18th, 20th, 22d; Johnstown, 13th, 15th, 17th, 22d, 23d; Emporium, 13th, 16th, 17th, 20th, 21st, 22d, 23d; East Mauch Chunk, 17th, 22d; State College, 13th, 17th, 22d; Coatesville, 17th, 22d; Kennett Square, 15th, 17th; Phoenixville, 13th, 15th, 17th; Westtown, 17th; Lock Haven, 13th, 17th; Saegerstown, 12th, 13th, 14th, 16th, 17th, 18th, 21st, 22d, 23d; Carlisle, 17th; Harrisburg, 17th, 22d; Edinboro, 12th, 21st; Uniontown, 13th, 17th, 22d, 23d, 28th; Chambersburg, 22d; Huntingdon, 17th, 22d; Lebanon, 17th, 22d; Coopersburg, 17th; Drifton, 21st; White Haven, 16th, 17th, 22d, 23d; Wilkes-Barre, 17th; Williamsport, 17th, 22d; Greenville, 13th, 17th, 18th, 21st; Pottstown, 17th; South Bethlehem, 17th; Easton, 17th; Aqueduct, Logania, 2d, 15th, 16th, 17th, 22d, 23d; Philadelphia (Weather Bureau), 17; (Centennial Avenue), 17th; Blooming Grove, 16th, 17th; Shingle House, 13th 16th, 17th, 20th, 21st, 23d; Selinsgrove, 13th, 17th, 21st; Somerset, 10th, 13th, 17th, 18th, 22d; Wellsboro, 13th, 16th, 17th, 18th, 20th, 22d; Lewisburg, 17th, 20th, 22d; Dyberry, 2d, 3d, 13th, 16th, 17th, 20th, 21st, 22d, 23d, 29th; Honesdale, 13th, 14th, 16th, 17th, 22d, 23d; Salem Corners (Hamlinton), 13th, 14th, 15th, 16th, 17th, 18th, 22d; South Eaton, 16th, 22d, 23d; York, 17th.

Sleet.—Le Roy, 12th; Salem Corners (Hamlinton), 12th.

Coronae.—Towanda, 4th, 5th, 30th.

Solar Halo.—Le Roy, 16th, 17th; Towanda, 15th, 18th; South Bethlehem, 17th; Philadelphia (Weather Bureau), 17th; (Centennial Avenue), 2d, 11th, 17th, 24th; Wellsboro, 17th.

Lunar Halo.—Towanda, 3d; Philadelphia (Weather Bureau), 7th.

Parhelias.—Le Roy, 3d.

Precipitation During May, 1895.

Monthly Weather Review for June, 1895.

Hall of the Franklin Institute,
Philadelphia, June 30, 1895.

General Review.

The average temperature for June, 1895, 71.4, is 2.1 above the average (69.3) for the past seven years.

The highest recorded temperatures occurred on the 1st, 2d, 3d, 4th and 5th, and were as follows: Logania, 104, degrees; Lock Haven, 103 degrees; Johnstown, 102 degrees, and Hollidaysburg, 101 degrees.

The lowest were on the 6th, 7th and 8th: Saegerstown, 32 degrees; Greenville, 36 degrees; Wellsboro, 36 degrees; Smethport, 38 degrees, and Shingle House, 38 degrees.

From January 1, 1895, to June 30, 1895, the accumulated deficiency in daily mean temperature at Philadelphia was 226 degrees; at Erie, 220 degrees, and at Pittsburg, 24 degrees.

For the same period the accumulated excess in precipitation, in inches, at Philadelphia, was 0.65, and deficiency at Erie, 7.30, and at Pittsburg, 5.87.

Temperature.

	Mean Temperature, Degrees.	Mean Precipitation, Inches.
June, 1888,	68.6	3.04
1889,	66.5	5.43
1890,	70.3	3.42
1891,	68.7	4.50
1892,	71.7	5.64
1893,	69.6	3.12
1894,	69.6	2.57
1895,	71.4	3.50

The means of the daily maximum and minimum temperatures, 83.4 degrees and 59.4 degrees, respectively, give a monthly mean of 71.4 degrees, which is 1.8 degrees above the corresponding month of 1894.

The average daily range was 24.0 degrees.

Highest monthly mean, 75 degrees at Pittsburg.

Lowest monthly mean, 66.6 degrees, at Smethport.

Highest temperature recorded during the month, 104 degrees on the 2d at Aqueduct, Logania.

Lowest temperature, 32 degrees, on the 6th, at Saegerstown.

Greatest local monthly range, 65 degrees, at Saegerstown.

Least local monthly range, 41 degrees, at Coopersburg and Williamsport.

Greatest daily range, 46 degrees, at Hollidaysburg, Lock Haven and Smethport.

Precipitation.

The average precipitation for the State, for the month, 3.50 inches, is 0.46 inches less than the average (3.96) for the past seven years.

The largest monthly totals of rainfall, in inches, were: Chambersburg, 9.21; Phoenixville, 5.32; DuBois, 5.24, and Williamsport, 4.99.

The least were: Sagerstown, 0.69; (Salem Corners) Hamlinton, 1.15; (Aqueduct) Logania, 1.65; Mauch Chunk, 1.74, and Drifton, 1.77.

Wind and Weather.

The prevailing wind was from the west.

Average number: rainy days, 9; clear days, 13; fair days, 10; cloudy days, 7.

Barometer.

The mean pressure for the month, 30.07, is about .10 above the normal. At the United States Weather Bureau Stations the highest observed was 30.48, at Harrisburg on the 17th, and the lowest 29.77, at Erie on the 13th.

Miscellaneous Phenomena.

Thunderstorms.—1st, 2d, 3d, 4th, 5th, 6th, 11th, 12th, 13th, 14th, 15th, 21st, 22d, 23d, 24th, 25th, 26th, 27th, 28th, 29th and 30th.

Note.—A few sections of the State suffered from drought during the midde portion of the month.

T. F. TOWNSEND,
Observer in Charge.

Precipitation for June, 1895.

Monthly Weather Review for July, 1895.

Hall of the Franklin Institute,
Philadelphia, July 31, 1895.

General Review.

The average temperature for July, 1895, 69.1 degrees, is 1.9 degrees below the average (71.0) for the past seven years.

The highest recorded temperatures occurred on the 20th and were as follows: (Aqueduct) Logania, 102 degrees; Lebanon, 99 degrees; Blooming Grove, 99 degrees; York, 99 degrees; Lock Haven, 98 degrees; Selinsgrove, 98 degrees, and Wilkes-Barre, 98 degrees.

The lowest were on the 2d, 4th, 10th and 15th: Shingle House, 34 degrees; Saegerstown, 35 degrees; Wellsboro, 35 degrees, and Dyberry, 39 degrees.

From January 1, 1895, to July 31,, 1895, the accumulated deficiency in daily mean temperature at Philadelphia was 312 degrees; at Erie, 348 degrees and at Pittsburg, 361 degrees.

For the same period the deficiency in precipitation in inches, at Philadelphia, was 0.65; at Erie, 7.61, an dat Pittsburg, 8.61.

Temperature.

	Mean Temperature. Degrees.	Mean Precipitation. Inches.
July, 1888, ...	69.4	3.45
1889, ...	71.2	6.80
1890, ...	70.8	3.52
1891, ...	67.9	6.32
1892, ...	72.0	3.93
1893, ...	72.0	3.15
1894, ...	73.8	2.32
1895, ...	69.1	3.24

The means of the daily maximum and minimum temperatures, 80.6 degrees and 57.6 degrees, respectively, give a monthly mean of 69.1 degrees, which is 4.7 degrees below the corresponding month of 1894.

The average daily range was 23.0 degrees.

Highest monthly mean, 73.2 degrees, at Philadelphia.

Lowest monthly mean, 62.6 degrees, at Wellsboro.

Highest temperature recorded during the month, 102 degrees, on the 20th at Aqueduct, Logania.

Lowest temperature, 34 degrees on the 4th, at Shingle House.

Greatest local monthly range, 60 degrees, at Saegerstown.

Least local monthly range, 37 degrees, at Cassandria.

Greatest daily range, 52 degrees at Saegerstown.

Precipitation.

The average precipitation for the State for the month, 3.24 inches, is 0.97 inches less than the average (4.21 inches) for the past seven years.

The largest monthly totals of rainfall in inches were: Confluence, 6.18; Saltsburg, 6.16; Uniontown, 5.61; East Mauch Chunk, 5.41; Greensboro, 5.25, and Salem Corners, 5.09.

The least were: Harrisburg, 1.16; Shingle House, 1.30; Gettysburg, 1.37; York, 1.41; West Chester, 1.73, and Altoona, 1.75.

Wind and Weather.

The prevailing wind was from the west.

Average number: rainy days, 9; clear days, 12; fair days, 12; cloudy days, 7.

Barometer.

The mean pressure for the month, 29.99, is about .03 above the normal. At the United States Weather Bureau Stations, the highest observed was 30.30, at Pittsburg and Erie on the 3d, and the lowest 29.66, at Erie on the 8th.

Miscellaneous Phenomena.

Thunderstorms.—1st, 4th, 5th, 9th, 13th, 15th, 16th, 17th, 20th, 21st, 22d, 23d, 25th, 27th, 28th and 30th.

Hail.—5th, 16th, 20th, 21st, 27th.

Frost.—4th, 10th, 11th, 13th, 14th, 30th, 31st.

Solar Halo.—Philadelphia, 12th, 24th.

Lunar Halo.—Philadelphia, 1st.

Meteor.—Chambersburg, 17th.

Note.—Observers are requested to send in their monthly records as early as practicable.

T. F. TOWNSEND,
Observer in Charge.

Precipitation for July, 1895.

Monthly Weather Review for August, 1895.

Hall of the Franklin Institute,
Philadelphia, August 31, 1895.

General Review.

The average temperature for August, 1895, 72.3 degrees, is 2.9 degrees above the average (69.4 degrees) for the past seven years.

The highest recorded temperatures occurred on the 11th and were as follows: (Aqueduct) Logania, 101 degrees; Lebanon, 100 degrees; York, 100 degrees; Gettysburg, 99 degrees, and Carlisle, 99 degrees.

The lowest were on the 22d: Dyberry, 32; Smethport, 34; Saegerstown, 34, and Towanda, 35.

From January 1, 1895, to August 31, 1895, the accumulated deficiency in the daily mean temperature at Philadelphia, was 209 degrees; at Erie, 301 degrees, and at Pittsburg, 280 degrees.

For the same period the deficiency in precipitation, in inches, at Philadelphia was 4.90; at Erie, 7.64, and at Pittsburg, 7.72.

Temperature.

	Mean Temperature, Degrees.	Mean Precipitation, Inches.
August, 1888,	69.5	7.05
1889,	67.4	3.24
1890,	68.4	5.76
1891,	69.7	5.09
1892,	71.3	3.77
1893,	70.2	4.50
1894,	69.4	1.84
1895,	72.3	3.23

The means of the daily maximum and minimum temperatures, 84.5 degrees and 60.1 degrees, respectively, give a monthly mean of 72.3 degree, which is 2.9 degrees above the corresponding month of 1894.

The average daily range was 24.4 degrees.

Highest monthly mean, 77.4 degrees, at Philadelphia.

Lowest monthly mean, 63.6 degrees, at Wellsboro.

Highest temperature recorded during the month, 101 degrees, on the 11th, at (Aqueduct) Logania.

Lowest temperature, 32 degrees on the 22d, at Dyberry.

Greatest local monthly range, 60 degrees at Huntingdon and Dyberry.

Least local monthly range, 40 degrees at (Immel Reservoir) Lycippus.

Greatest daily range, 47 degrees, at Saegerstown.

Precipitation.

The average precipitation for the State, for the month, 3.23 inches, is 1.23 inches less than the average (4.46 inches) for the past seven years.

The rainfall was badly distributed, and injurious drought prevailed in many sections of the State during most of the month.

The largest monthly totals of rainfall, in inches, were: Saegerstown, 6.03; Point Pleasant, 5.67, and Chambersburg, 5.31.

The least were: Philadelphia, 0.59; Huntingdon, 1.46; Pottstown, 1.64, and Lebanon, 1.97.

Wind and Weather.

The prevailing wind was from the west.

Average number: rainy days, 9 ; clear days, 15 ; fair days, 11; cloudy days, 5.

Barometer.

The mean pressure for the month, 29.97, is about .01 below the normal. At the United States Weather Service Bureau Stations the highest observed was 30.31, at Harrisburg, on the 22d, and the lowest, 29.71 at Erie on the 6th.

Miscellaneous Phenomena.

Thunderstorms.—3d, 4th, 5th, 6th, 7th, 9th, 10th, 11th, 12th, 13th, 15th, 16th, 17th, 18th, 19th, 23d, 24th, 27th, 28th, 29th and 31st.

Hail.—4th, 6th, 8th, 11th, 15th, 18th.

Frost.—18th, 20th, 22d and 26th.

Solar Halo.—Philadelphia, 21st.

Aurora.—Cassandria, 25th; (Salem Corners), Hamlinton, 25th.

T. F. TOWNSEND,
Observer in Charge.

Precipitation for August, 1895.

Monthly Weather Review for September, 1895.

Hall of the Franklin Institute,
Philadelphia, September 30, 1895.

General Review.

The average temperature for September, 1895, 67.8 degrees, is 5.1 degrees above the average (62.7 degrees) for the past seven years.

The highest recorded temperatures occurred on the 21st and 22d and were as follows: Carlisle, 100 degrees; Coatesville, 100 degrees, and Hamburg, 100 degrees.

The lowest were on the 15th: Shingle House, 24 degrees; Dyberry, 26 degrees; Towanda, 28 degrees, and Wellsboro, 28 degrees.

From January 1, 1895, to September 30, 1895, the accumulated deficiency in daily mean temperature at Philadelphia was 67 degrees; at Erie, 215 degrees, and at Pittsburg, 134 degrees.

For the same period the deficiency in precipitation, in inches, at Philadelphia was, 7.72; at Erie, 7.77, and at Pittsburg, 8.52.

Temperature.

	Mean Temperature. Degrees.	Mean Precipitation. Inches.
September, 1888,	59.0	4.84
1889,	61.9	5.05
1890,	62.0	4.57
1891,	66.4	2.39
1892,	62.3	2.81
1893,	60.9	2.67
1894,	66.6	6.30
1895,	67.8	1.71

The means of the daily maximum and minimum temperatures, 79.8 degrees and 55.7 degrees, respectively, give a monthly mean of 67.8 degrees, which is 1.2 degrees above the corresponding month of 1894.

The average daily range was 24.1 degrees.

Highest monthly mean, 73.0 degrees, at Philadelphia, Sansom street.

Lowest monthly mean, 58.7 degrees at Wellsboro.

Highest temperature recorded during the month, 100 degrees on the 21st at Coatesville, and on the 22d at Carlisle and Hamburg.

Lowest temperature 24 degrees on the 15th, at Shingle House.

Greatest local monthly range, 68 degrees, at Dyberry.

Least local monthly range, 45 degrees, at Cassandria.

Greatest daily range, 49 degrees at Scranton.

Precipitation.

The average precipitation for the State, for the month, 1.71 inches, is 2.38 inches less than the average (4.09 inches) for the past seven years.

Injurious drought prevailed in nearly all parts of the State throughout the month. Streams and springs were unusually low. Most crops ripened prematurely.

The largest monthly totals of rainfall in inches were: Saegerstown, 5.41; Oil City, 5.15; Clarion, 4.60; Lewisburg, 4.11, and York, 4.01.

The least were: Reading, 0.37; Brower's Lock, 0.47; Somerset, 0.50; Philadelphia (Centennial Avenue), 0.53; Point Pleasant, 0.55; Lock No. 4, 0.55, and Greensboro, 0.55.

Wind and Weather.

The prevailing wind was from the west.

Average number: rainy days, 6; clear days, 16; fair days, 9; cloudy days, 5.

Barometer.

The mean pressure for the month, 30.06, is about .02 below the normal. At the United States Weather Bureau Stations the highest observed was 30.42, at Harrisburg on the 15th, and the lowest 29.66, at Erie, on the 18th.

Miscellaneous Phenomena.

Thunderstorms.—2d, 6th, 7th, 8th, 9th, 10th, 11th, 12th, 16th, 17th, 18th, 19th, 25th and 26th.

Hail.—9th, 10th and 30th.

Frost.—2d, 14th, 15th, 25th, 28th, 29th and 30th.

Snow.—29th and 30th.

Sleet.—Shingle House, 30th; Cassandria, 30th.

Solar Halo.—Le Roy, 6th, 19th.

T. F. TOWNSEND,
Observer in Charge.

Precipitation for September, 1895.

Monthly Weather Review for October, 1895.

Hall of the Franklin Institute,
Philadelphia, October 31, 1895.

General Review.

The average temperature for October, 1895, 47.3 degrees, is 2.9 degrees below the average (50.2 degrees) for the seven years.

The highest recorded temperatures occurred on the 3d, 5th, 6th and 19th and were as follows: Coatesville, 78 degrees; Huntingdon, 78 degrees, and South Bethlehem, 78 degrees.

The lowest were on the 11th, 22d, 23d and 30th: Dyberry, 17 degrees; Hollidaysburg, 17 degrees, and Huntingdon, 17 degrees.

From January 1, 1895, to October 31, 1895, the accumulated deficiency in daily mean temperature at Philadelphia was 136 degrees; at Erie, 415 degrees, and at Pittsburg, 304 degrees.

For the same period the deficiency in precipitation, in inches, at Philadelphia was 7.69; Erie, 8.70, and at Pittsburg, 10.04.

1891,	50.4	3.06
1892,	50.5	0.78
1893,	52.8	3.26
1894,	53.6	4.26
1895,	47.3	1.99

The means of the daily maximum and minimum temperatures, 59.4 degrees and 35.2 degrees, respectively, give a monthly mean of 47.3 degrees, which is 6.3 degrees below the corresponding month of 1894.

The average daily range was 24.2 degrees.

Highest monthly mean, 53.0 degrees at Philadelphia (Weather Bureau).

Lowest monthly mean, 41.0 degrees at Wellsboro.

Highest temperature recorded during the month, 76 degrees, occurring on the 3d, at Coatesville; 5th and 6th at South Bethlehem, and 19th at Huntingdon.

Lowest temperatures, 17 degrees, on the 11th, 23d and 30th at Hollidaysburg; 22d, at Dyberry, and 30th at Huntingdon.

Greatest local monthly range, 61 degrees, at Huntingdon.

Least local monthly range, 40 degrees, at Philadelphia.
Greatest daily range, 31 degrees, at Hollidaysburg.

Precipitation.

The average precipitation for the State, for the month, 1.98 inches, is 1.60 inches less than the average (3.59 inches) for the past seven years.

The largest monthly totals of rainfall, in inches, were: Easton, 4.63; Ottsville, 4.10; Coopersburg, 4.08; Smith's Corner, 3.99; Point Pleasant, 3.95, and Seisholtzville, 3.75.

The least were: Davis Island Dam, 0.45; Freeport, 0.47; Beaver Dam, 0.52; Altoona, 0.55; Mahoning, 0.56, and Stoyestown, 0.59.

The long-continued and injurious drought extended into and during October, until the 12th and 13th, when the surface drought was practically broken in the Delaware basin, and in the eastern portions of the Susquehanna basin. Heavy rains occurred again in those sections on the 31st. In the Ohio basin the drought continued during the entire month, the total rainfall for that section averaging only nine-tenths of an inch.

Previous to the breaking of the drought in the Delaware basin, the water in the Delaware river was quite brackish at Philadelphia.

Wind and Weather.

The prevailing wind was from the west.

Average number: rainy days, 5; clear days, 17; fair days 8; cloudy days, 6.

Barometer.

The mean pressure for the month, 30.07, is about normal. At the United States Weather Bureau Stations, the highest observed was 30.59, at Philadelphia on the 30th, and the lowest 29.55, at Philadelphia on the 13th.

Miscellaneous Phenomena.

Thunderstorms.—12th, 27th.
Hail.—8th, 31st.
Snow.—9th, 15th, 17th, 20th, 21st, 22d, 27th, 29th, 30th, 31st.
Sleet.—8th, 30th, 31st.
Aurora.—11th, 12th, 13th, 14th.
Solar Halo.—11th, Philadelphia (Centennial Avenue).
Lunar Halo.—7th, 30th.

T. F. TOWNSEND,
Observer in Charge.

Precipitation for October, 1895.

John Crathwohl, voluntary observer, Blooming Grove, died October 22, 1895.

Monthly Weather Review for November, 1895.

Hall of the Franklin Institute,
Philadelphia, November 30, 1895.

General Review.

The average temperature for November, 1895, 42.9 degrees, is 2.9 degrees above the average (40.0 degrees) for the past eight years.

The highest recorded temperatures occurred on the 8th and 9th, and were as follows: Lancaster, 78 degrees; Somerset, 78 degrees; Logania, 77 degrees, and York, 77 degrees.

The lowest were on the 22d: Smethport, 6 degrees; Shingle House, 8 degrees; Saegerstown, 9 degrees, and Dyberry, 10 degrees.

From January 1, 1895, to November 30, 1895, the accumulated deficiency in daily mean temperature at Philadelphia was 134 degrees; at Erie, 438 degrees, and at Pittsburg, 276 degrees.

For the same period the deficiency in precipitation, in inches, at Philadelphia was 8.61; at Erie, 8.76, and at Pittsburg, 10.41.

Temperature.

	Mean Temperature, Degrees.	Mean Precipitation, Inches.
November, 1887,	39.2	1.60
1888,	42.0	3.37
1889,	41.0	6.72
1890,	41.5	1.49
1891,	39.6	2.65
1892,	39.1	4.34
1893,	39.1	2.93
1894,	38.2	2.50
1895,	42.9	2.48

The means of the daily maximum and minimum temperatures, 52.2 degrees and 33.6 degrees, respectively, give a monthly mean of 42.9 degrees, which is 4.7 degrees above the corresponding month of 1894.

The average daily range was 18.6 degrees.

Highest monthly mean, 47.0 degrees, at Philadelphia (Weather Bureau).

Lowest monthly mean, 37.5 degrees, at Shingle House.

Highest temperature recorded during the month, 78 degrees on the 8th at Somerset, and on the 9th at Lancaster.

Lowest temperature, 6 degrees on the 22d at Smethport.

Greatest local monthly range, 67 degrees at Somerset.

Least local monthly range, 44 degrees at South Bethlehem.

Greatest daily range, 45 degrees at Saegerstown.

Precipitation.

The average precipitation for the State, for the month, 2.43 inches, is 0.74 inches less than the average (3.22 inches) for the past eight years.

The largest monthly totals of rainfall, in inches, were: Warren, 5.73; Oil City, 5.11; Erie, 4.37; Clarion, 4.33; Salem Corners, 4.26, and Saegerstown, 4.21.

The least were: Hollidaysburg, 0.97; Huntingdon, 1.07; Reading, 1.20; Altoona, 1.30; Lancaster, 1.36, and Wilkes-Barre, 1.37.

General rains occurred on the 1st, 9th, 10th, 15th, 20th, 24th, 25th and 26th.

The snowfall was light.

Wind and Weather.

The prevailing wind was from the west.

Average number: rainy days, 10; clear days, 10; fair days, 8; cloudy days, 12.

Barometer.

The mean pressure for the month, 30.18, is about 13 above the normal. At the United States Weather Bureau Stations the highest observed was 30.69, at Harrisburg on the 28th, and the lowest 29.42, at Erie on the 26th.

Miscellaneous Phenomena.

Thunderstorms.—10th, 26th.

Hail.—2d, 10th, 25th.

Snow.—2d, 9th, 10th, 11th, 20th, 21st, 22d, 23d, 24th, 25th, 26th, 27th, 28th, 30th.

Sleet.—2d, 10th, 22d, 25th, 26th.

Solar Halo.—19th.

Lunar Halo.—1st, 5th, 27th.

Coronae.—1st, 2d, 27th, 29th, 30th.

Meteor.—10th.

T. F. TOWNSEND,
Observer in Charge.

U. S. Department of Agriculture—Weather Bureau,
Office of the State Weather Service,
Philadelphia, Pa., January 30, 1896.

Mr. W. P. Tatham, Director Pennsylvania State Weather Service,
Philadelphia, Pa.:

Sir: I have the honor to submit herewith for publication in the annual report of the Secretary of Internal Affairs, general tables of temperature and precipitation for the State of Pennsylvania, from 1888 to 1895, inclusive, compiled from the records of the Pennsylvania State Weather Service, together with some earlier data of the State not heretofore published.

These records supplement those published in the annual report of the Secretary of 1888, and should add greatly to the value of and interest in the climatic data of Pennsylvania.

For convenience of reference and comparison, the results or sum totals of the averages published in 1888 are also included in the present tables, and are referred to under "authority" as "report of 1888." which report, together with the "Monthly Weather Review," should be consulted when details are desired.

Very respectfully,
T. F. TOWNSEND,
U. S. Observer in Charge.

Hall of the Franklin Institute,
Philadelphia, January, 30, 1896.

Respectfully forwarded to Genl. James W. Latta, Secretary of Internal Affairs of Pennsylvania, Harrisburg, Pa.

W. P. TATHAM,
Chairman.

THE DISPUTED TERRITORY BETWEEN PENNSYLVANIA AND VIRGINIA, AND LAND TITLES THEREIN.

A boundary controversy that involved the right to a considerable area of land, now within the limits and jurisdiction of our State, began as early as the year 1754, between the colonial authorities of Virginia on the one side, and Governor James Hamilton, the representative of the proprietaries of Pennsylvania, on the other. Indeed, prior to that time, in 1749, Gov. Hamilton, in a letter to Thomas Lee, President of Virginia, on being informed by the latter that large grants of land on the branches of the Ohio river had been made "to certain gentlemen and merchants of the city of London and to inhabitants of the colony of Virginia," desired the opinion of the latter as to whether it would not be of use to have the western bounds of Pennsylvania fixed by commissioners of both governments in order to be assured that no part of these recent grants would fall within its limits, and at the same time expressing a readiness to appoint commissioners and surveyors, to act with others to be appointed by Virginia, for the purpose of ascertaining and running the lines, but this proposition did not meet with a favorable response, and no action was taken upon it. Following this, in 1752, by the alarming encroachments of the French, then pressing with energy and determination from Canada and the lakes towards the Ohio river, the authorities of both provinces were looking with great anxiety to the dangers that threatened their western borders. It became known in that year that the authorities of Virginia, as a matter of self protection, began to contemplate the erection of a fort at the junction of the Allegheny and Monongahela rivers, the present site of the city of Pittsburgh, a point which was believed to be of such great strategic importance that upon its possession in a large measure depended the control of the great Ohio Valley. Thomas Penn was not averse to the building of this fort by the Virginians, but, at the same time, was anxious that his own rights should not be in any way prejudiced by the enterprise. In March, 1752, he writes to Gov. Hamilton: "I desire you will enter into any reasonable measure to assist the government of Virginia to build there, to wit, at the Ohio, taking some acknowledgment from him, that this settlement shall not be made use of to prejudice our right to that country," and again, on the 13th of July, of the same year, he writes: "I hope you will, as I wrote you on the

9th of March, acquaint the Governor of Virginia that we consent to this (that is, to the building of a fort at the Ohio) without prejudice to our right to the land in case it should be found to lie within our province, to be granted to the bonafide settlers on the same terms and conditions as they are to have it from Virginia."

It was decided in 1754, by Governor Dinwiddie, of Virginia, that a fort should be built, and in order to raise a military force of sufficient strength for the purpose in view, on the 19th of February of that year, he issued his proclamation; and to encourage enlistments, made promises of land to be surveyed east of the Ohio to such persons as would enter his service. This proclamation in part reads as follows: "Whereas it is determined that a fort be immediately built on the "river Ohio, at the fork of Monongahela, to oppose any further en- "croachments or hostile attempts of the French, and the Indians, in "their interest, and for the security and protection of his majesty's "subjects in this colony, and as it is absolutely necessary that a suf- "ficient force should be raised to meet and support the same: For an "encouragement to all who shall voluntarily enter into said service, I "do hereby notify and promise, and by and with the advice and con- "sent of his majesty's council in this colony, that over and above their "pay, two hundred thousand acres of his majesty, the King of Great "Britain's lands, on the east side of the river Ohio, within this domin- "ion (one hundred thousand acres whereof to be contiguous to the "said fort, and the other one hundred thousand acres to be on or near "the river Ohio), shall be laid off and granted to such persons, who by "their voluntary engagement, and good behaviour, in the said service, "shall deserve the same." On the 13th of March following, Governor Hamilton wrote to Gov. Dinwiddie in answer to his proclamation that "the invasions, etc., having engaged me to inquire very particu- "larly into the bounds and extent of this province westwardly, I have "from thence the greatest reason to believe that the fort and lands "(intended to be granted) are really within the limits of Pennsyl- "vania." In reply, Dinwiddie, on the 21st of March, wrote to Hamil- ton: "I am much misled by our surveyors, if the forks of Monongialo "be within the limits of your Proprietor's grant." The reply of Gov. Dinwiddie, here quoted, appears to be the first recorded notice of the claim of Virginia to the southwestern corner of this State, and there- fore, to be regarded as the beginning of a dispute which was to con- tinue for thirty years before an adjustment was reached. In the sum- mer of 1754 a company of Virginians, under command of Captain Trent, arrived at the confluence of the rivers and commenced to build the proposed fort; but before they had completed their labors a force of one thousand French and Indians, with eighteen pieces of cannon, appeared before the unfinished stockade and compelled the little body

of forty-one men present for its defense to surrender. The French immediately built "Fort Duquesne," and remained in possession until forced, by the expedition of General Forbes, to destroy and abandon it in November, 1758, its place being taken by Fort Pitt, built in 1759.

The claim of Virginia embraced all the land west of Laurel Hill, included within the present counties of Westmoreland, Fayette, Greene, Washington, and parts of Allegheny and Beaver; whilst the Pennsylvania claim rested entirely upon the charter of Charles II, King of Great Britain, to William Penn, by which the lands granted to Penn were to extend westward five degrees in longitude from the river Delaware, and there had been sufficient investigation to convince the Pennsylvania Proprietaries that the point at which the two rivers united to form the Ohio was some distance within the limits of the royal grant to them. For twenty years, however, after 1754, there was no official correspondence between the authorities of the two colonies in relation to their claims, and, although the military grants promised in the proclamation of Gov. Dinwiddie were never surveyed or given to the persons who were to receive them, settlements within the bounds of the territory in dispute under Virginia rights were encouraged, and in a few years, after success had crowned the efforts of General Forbes to wrest from the French their hold upon the Ohio, and Colonel Boquet's expedition had driven away the Indians and relieved the beleaguered garrison at Fort Pitt, pioneer settlers began to appear along the Monongahela Valley.

On the part of the Pennsylvania authorities no rights were granted for lands west of the Allegheny mountains until after the treaty at Fort Stanwix in November, 1768, by which the Indian title to that section of the State was extinguished. Many applications authorizing surveys to be returned under the application system then in force, were entered early in 1769, and after that system ceased in September of the same year, many warrants for lands purchased were granted. Bedford county, which included within its limits the entire southwestern corner of the State to its western boundary, was formed in 1771, and from that time there was an active renewal of the boundary controversy, with conflict of jurisdiction and earnest contention between the two provinces. Emigrants from Pennsylvania, Maryland and Virginia, with rights from Pennsylvania and Virginia, had entered the disputed territory, and, with aroused feelings, as their sympathies and interests swayed them, became hot partisans either of Virginia or Pennsylvania. Lord Dunmore had in the meantime succeeded to the Governorship of Virginia, and threw himself into the controversy in behalf of his province with intense zeal, completely ignoring the Pennsylvania rights, under the charter of Charles II, to

any territory west of Laurel Hill, and asserting in offensive ways, by letters and proclamations, the rights of the province of Virginia to that portion of Penn's grant. In 1773 Lord Dunmore himself appeared at Fort Pitt, and appointed an agent, in the person of Dr. John Connelly, to whom was given authority to extend and strengthen, so far as possible, the power and jurisdiction of Dunmore over the inhabitants who had, at that early day, in the face of hardships, privations and dangers, ventured into that wild and comparatively unknown region. Connelly, in the performance of what he conceived to be his duty, proved to be a not less zealous and probably a more unscrupulous partisan of Virginia than his master. From the time of his arrival at Fort Pitt until his departure at the opening of the revolutionary struggle with the mother country, he appears in an unenviable light as an active fomenter of ill-will and strife among the settlers. Indeed, it seemed that he was actuated by a deliberately formed purpose of provoking animosities and antagonisms toward the Pennsylvania authorities. Westmoreland county was formed from a part of Bedford in 1773, and Hannastown, made historic by its destruction in 1782, by marauding Indians, assisted by a few renegade white men, was designated as the county seat. Magistrates were immediately appointed for the new county, and at Hannastown justice, according to the forms of law, was first administered west of the Allegheny mountains under the provincial government of Pennsylvania. On the first of January of the following year Connelly announced his assumption of the duties of his appointment by a proclamation, called at the time an advertisement, which was posted at Fort Pitt and in its vicinity. In this advertisement, in which he styled himself "Captain Commandant of the Militia of Pittsburg and its Dependencies," he says that his instructions are "to in-"sure his Majesty's subjects settled on the western waters, that, hav-"ing the greatest regard to their prosperity and interest, and con-"vinced from their repeated memorials of the grievances of which "they complain, that he proposes moving to the House of Burgesses "the necessity of erecting a new county to include Pittsburg, for the "redress of your complaints." * * * ; and further, "in order to "facilitate this desirable circumstance, I hereby require and com-"mand all persons in the Dependency of Pittsburg to assemble them-"selves there as a militia on the 25th instant, at which time I shall "communicate other matters for the promotion of public utility."

The action of Connelly did not escape the attention of the civil officers of Westmoreland county, and before the day appointed for the assembling of the militia at Pittsburg he was arrested by order of Arthur St. Clair, then prothonotary of the court, who afterward became General St. Clair. In a letter to Gov. Penn, dated February 2, 1774, giving a report in detail of his proceeding, St. Clair says:

"Dr. Connelly was arrested previous to the meeting, by my orders, on "his avowing himself the author of the advertisement requiring the "people to meet as a militia and committed on refusing to find se- "curities for his good behavior till next court." Connelly, however, did not remain long in confinement. After a few days he was permitted to return to Pittsburg under a promise, made upon his honor, to return to Hannastown before the term of court to be held in the coming month of April; but instead of remaining at Pittsburg he went up the Monongahela river to Redstone (now Brownsville), and from thence, guarded by a number of his adherents, to Virginia, returning to Pittsburg in March. With his body guard he took possession of the fort, and under later instruction from Dunmore, reiterated his determination to enforce the laws of Virginia. When the time for the meeting of the court of Westmoreland county arrived, Connelly was present to redeem his promise, but not in manner expected. He came with an armed force sufficiently strong to protect himself from re-arrest, defy the court, and to prevent himself, as he said, from being illegally taken to Philadelphia. His first move was to seize the court house and place armed sentinels at the door with orders not to permit anyone to enter until he had communicated with the magistrates. He sent a letter to the magistrates, in which he said: "I have come to free myself from a promise made to Captain "Proctor, but have not conceived myself amenable to this court, by "any authority from Pennsylvania, upon which account I cannot ap- "prehend that you have any right to remain here as justices of the "peace constituting a court under that province." But he expressed a willingness that the court might act in such matters as should be submitted to it by the acquiescence of the people until he received instructions to the contrary from Virginia. The justices of the court, regarding Connelly's action, not only as an inexcusable impertinence, but as a flagrant and outrageous usurpation of power to which they could not with any sense of personal dignity and self respect submit, of course declined to accede to his offer. The following is their reply: "The jurisdiction of this court and officers of the county of West- "moreland rests on the legislative authority of the Province of Penn- "sylvania, confirmed by His Majesty in council. That jurisdiction "has been regularly exercised, and the court and officers will con- "tinue to exercise it in the same regular manner. It is far from their "intention to occasion or foment disturbances, and they apprehend "that no such intention can with propriety be inferred from any part of "their conduct; on the contrary, they wish and will do all they can to "preserve the public tranquility. In order to contribute to this very "salutary purpose, they give information that every step will be "taken on the part of the Province of Pennsylvania to accommodate

"any difficulties that have arisen between it and the Colony of Vir-"ginia, by fixing a temporary line betwixt them." Thomas Smith, afterwards a member of the Continental Congress, and later a justice of the Supreme Court of Pennsylvania, under date of April 7, 1774, from "Westmoreland Court," writes to Joseph Shippen, Esq., a full account of these occurrences. In this letter he says: "We heard "when we came up to this court that he (Connelly) was mustering a "large party in order to prevent the court from sitting; we thought "that there could be no foundation for such a report, but at the same "time we thought it prudent to order the sheriff to raise as many "men as he could collect, to prevent us from being insulted by a law-"less set of men, acting under the color of authority—the time was so "short that but few were collected on our side, and those few were "ill-armed, so that we found ourselves in a very disagreeable situa-"tion when we received certain intelligence that Connelly was coming "down with 200 armed men; when we found that they were near at "hand the magistrates thought it prudent to adjourn the court, as "it was near the time." Immediately following the adjournment of the court came the arrest of Aeneas Mackey, Devereux Smith and Andrew McFarland, three of the Westmoreland county justices who resided at Pittsburg. They had returned to their homes from Hannastown, on the 9th of April, and on the next day were arrested by order of Connelly. The charge against them was that they were parties to the answer of the court given to Connelly, and upon their refusal to recognize his authority by entering bail for their appearance at Staunton, Virginia, to be there tried in court, they were immediately sent under guard to that place to be confined in jail. Before reaching Staunton it appears that one of their number, Mackey, was permitted to go to Williamsburg, Virginia, to present his account of the arrest to Lord Dunmore. After hearing the story, Dunmore said in reply that Connelly had authority to prosecute the claim of Virginia "to Pittsburgh and its Dependencies," and that in making arrests he only imitated the officers of Pennsylvania, who had imprisoned him. The justices, however, were released from arrest and permitted to return home.

Governor John Penn, had been fully advised of the intentions and proceedings of Connelly and his followers. His anxiety for the security of the possessions of the Proprietaries was aroused, and he felt that the time for action on his part had come. Accordingly, on the 31st of January, 1774, a letter was addressed by him to Lord Dunmore, in which he first referred to the conduct of Connelly in commanding the people to meet him as a militia at Pittsburg, and assuming to exercise jurisdiction over them as settlers under the government of Virginia, as a step so sudden and unexpected as to be not

only a matter of great surprise to him, but that it was also very alarming to the inhabitants who had taken, improved and had hitherto enjoyed their lands under Pennsylvania grants. With a view to convince Lord Dunmore of the justice of his claim, he continued in a conciliatory tone: "Being, however, too well acquainted with your "Lordship's character to admit the least idea that you would countenance a measure injurious to the rights of the Proprietaries of Pennsylvania, or which might have a tendency to raise disturbances within the Province, I flatter myself that the laying before you a short "statement of the limits of this Province, so far as regards the present question, and acquainting you with the steps which have been "taken to ascertain its western extent, and the situation of Pittsburg, "will be abundantly sufficient to satisfy you that that place is, beyond "all doubt, within this Province. The western extent of the Province "of Pennsylvania, by the Royal Grant, is five degrees of longitude "from the River Delaware, which is its eastern boundary. In the year "1768, an east and west line was run from the Delaware, at the "mouth of Christiana Creek, to the crossing of Dunkard creek, a "branch of the Monongahela, by Messrs. Dixon and Mason, two surveyors of distinction, who were sent over from England to run the "division line between Maryland and Pennsylvania. These artists "fixed the latitude and extent of that line with the utmost exactness "and precision, to the satisfaction of the commissioners on both sides. "From the 233d milestone on this line a north line hath been since "carefully run and measured to the Ohio, and from thence up to Fort "Pitt; the several courses of the river have been taken with all possible care. From the line of Dixon and Mason to a known point in "the south line of the city of Philadelphia, the true courses and distances hath been discovered by actual survey, as also from the point "aforesaid, to that part of the river Delaware which is in the same "latitude as Fort Pitt, and from these several data, the most exact "calculations have been made by Dr. Smith, Provost of our College, "and Mr. Rittenhouse, our Surveyor General, in order to ascertain the "difference of longitude between Delaware and Pittsburg, who all "agree that the latter is near six miles eastward of the westward "extent of the Province." A map of the lines run, with calculations and explanatory notes accompanied this letter; and hoping to avoid the trouble that must arise from clashing and disputed jurisdiction, his Lordship was requested, if he should still entertain doubts respecting the dispute, to defer appointing officers and exercising authority in that neighborhood, and thus permit the settlers to remain in undisturbed possession of their lands held under rights granted by the authorities of Pennsylvania until a temporary line of jurisdiction could be agreed upon by commissioners to be appointed by both gov-

ernments, or until the question of boundaries could be settled finally by His Majesty, the King of England. Dunmore's reply, under date of March 5, 1774, to the letter of John Penn, was an emphatic refusal to accept the map and calculations transmitted with the letter, on the ground that the observations on which they were founded were made without the participation of Virginia, and because the right of the Proprietaries of Pennsylvania to the country about Pittsburg must be founded "on better authority than is there adduced to make it valid;" and while disclaiming any intention of causing disturbances he declined to defer the appointing of officers. He also justifies Connelly in all his proceedings and insisted that reparation be made for his arrest by the dismissal of St. Clair from office, characterizing the arrest as "a great insult on the authority of His Majesty's Government in Virginia." John Penn's answer to the above letter, dated Philadelphia, March 31, 1774, is a review of the dispute from the time it began with the proposed building of a fort at the junction of the Allegheny and Monongahela rivers. And to avert disturbances and dissensions he again asks Dunmore "to defer attempting to extend "the jurisdiction of Virginia within the bounds claimed by the Pro- "prietaries of Pennsylvania; the more so because," as he says, "a pe- "tition for a commission to run out and mark the boundaries be- "tween us is now depending before His Majesty." He also again takes occasion to state the claim of Pennsylvania as follows: "I must take "this opportunity of notifying your Lordship that the Proprietaries of "Pennsylvania do claim, by their said petition, as part of their Prov- "ince of Pennsylvania, all lands lying west of a south line to be "drawn from Mason and Dixon's line as it is commonly called, at the "westernmost part of the province of Maryland, to the beginning of "the fortieth degree of north latitude, to the extent of five degrees of "longitude from the river Delaware, and I must request your Lord- "ship will neither grant lands nor exercise the government of Vir- "ginia within those limits, till his Majesty's pleasure be known."

Correspondence having thus failed to bring about an adjustment of the dispute, the situation, in the conflict of jurisdiction set up and maintained by each party, became more and more alarming, while the danger of actual collision between the settlers, adherents of one side or the other, increased each day. The Pennsylvania authorities, in this threatening emergency, were still anxious for peace, and in the hope that outbreaks and probably bloodshed might be prevented, determined that one more effort looking to the establishment of a temporary line should be made. Accordingly two commissioners, in the persons of James Tilghman and Andrew Allen, members of the council of the Province, were appointed by Gov. John Penn, and, under written instructions, were directed to proceed to Williamsburg, Va.,

to treat in person with Lord Dunmore, for a temporary line, in order that the "public peace and tranquility on the border" might be preserved. These commissioners proceeded to Virginia, but their mission was a failure. They first called upon Dunmore to pay their respects to him and to inform him of the object of their presence: first, to ask him join the Proprietaries of Pennsylvania in a petition to the Crown to appoint commissioners to run the lines of Pennsylvania to the westward; and, second, in the meantime, to agree with his Lordship upon a line of jurisdiction to remedy the inconveniences of clashing jurisdictions and prevent them in the future. His Lordship desired the propositions of the commissioners to be reduced to writing, which was accordingly done. Several letters passed between the commissioners and Dunmore, but nothing came of the negotiations. The latter would not concede anything to the commissioners, or agree that their construction of the royal grant to Penn was in any way correct, contending, according to his construction of the charter, that Fort Pitt must be fifty miles outside of the boundary of Pennsylvania, and asserting that it would be impossible for him to consent to any settlement that would oblige him to surrender jurisdiction over Fort Pitt and the surrounding country. The commissioners, extremely desirous that they should not wholly fail in their mission to secure an understanding of some kind, as a last effort, and as the utmost they could concede, then agreed to recede from their construction of the charter limits so far as to make the river Monongahela, from Mason and Dixon's line downwards to the Ohio, the western line of jurisdiction, believing that such an adjustment would, as they said, "at once "settle our present disputes without great trouble and expense in "running lines, or the inconvenience of keeping the jurisdiction in "suspense." This proposition was likewise rejected, and further efforts on the part of the commissioners to secure an accommodation of the trouble ceased. Their last communication was addressed to Lord Dunmore on the 27th of May, 1774, and they announced the following day as the time for their departure.

To add to the hardships of the settlers on the western borders during the summer of 1774, Indian troubles came upon them, and they were threatened with the most dire consequences. Massacres occurred, a panic ensued, and safety was found only in flight to the east side of the Monongahela. During this gloomy period Lord Dunmore at the head of an armed force, ostensibly for the purpose of suppressing the Indian outbreak, again appeared at Fort Pitt, the name of which had been changed to Fort Dunmore. While at that place, not unmindful of his determined purpose to retain jurisdiction over the region, he issued a proclamation to the people in which he denounced the actions of the authorities of the province of Pennsylvania in "un-

"duly laying claim to a very extensive and valuable quantity of His "Majesty's territory." He also sets forth the ancient claim of the colony of Virginia to the same territory and his own right, under His Majesty, to govern the same. This remarkable document is dated "Fort Dunmore, September 17, 1774." After the whereas, it concludes with the following sweeping order: "I do hereby, in His Maj- "esty's name, require and command all His Majesty's subjects west of "Laurel Hill to pay due respect to this my proclamation, strictly pro- "hibiting the execution of any act of authority on behalf of the Pro- "vince of Pennsylvania at their peril in this country; but on the con- "trary, that a due regard and entire obedience to the laws of His Maj- "esty's colony of Virginia, under my administration, be observed." Governor Penn did not permit Dunmore's proclamation to pass without notice. Attention was called to it by a counter pronunciamento from Philadelphia, dated the 12th of October, in which the Governor says, in substance, that, although the western limits of Pennsylvania were not fixed by any authority from the Crown, it has been demonstrated by lines accurately run that the country west of Laurel Hill, including Fort Pitt, was within the charter bounds of the province; that it had been in great part actually held and settled under grants from the Proprietaries of Pennsylvania; and that peaceable jurisdiction had been exercised over it until the late "strange claim set up by the Earl of Dunmore." In justice to the Proprietaries, who were only desirous of securing their own undoubted property from the encroachment of others, he says, further: "I have thought, with the "advice of the council, to issue this, my proclamation, hereby requir- "ing all persons west of Laurel Hill to retain their settlements as "aforesaid made under this province, and to pay all due obedience to "the laws of this government; and all magistrates and other officers "who hold commissions or offices under this government, to proceed "as usual in the administration of justice, without paying the least "regard to the said recited proclamation until His Majesty's pleasure "shall be known in the premises, at the same time strictly charging "and enjoining the said inhabitants and magistrates to use their ut- "most endeavors to preserve peace and good order." While the magistrates of Pennsylvania were thus instructed to maintain their jurisdiction, they were requested, in view of the fact that Dunmore had an organized militia force to sustain his pretentions, to be cautious in entering into conflict with his officers, and not to proceed to criminal prosecution against them for endeavoring to enforce the laws of Virginia. At the close of the Indian war in October, 1774, Dunmore returned to Virginia, first causing the arrest of Thomas Smith, at Redstone, for acting as a Pennsylvania magistrate, placing him under bonds with two sureties to appear at a court to be held at Pitts-

burg, or Fort Dunmore, as it was now called by the Virginians. The territory claimed by Dunmore at that time was treated as part of Augusta county, and the time fixed for the court was the 20th of December, 1774; a postponement occurred and it was not until the 21st of February, 1775, that the first court was held at Fort Dunmore. At this time the magistrates appointed by Dunmore appeared, and, after taking the oath of office, took their seats as justices of the court; and from then until the settlement of the boundary, in 1780, dual sets of officers asserted their right to exercise authority over the same people. Among the magistrates of Dunmore's court was George Crogan, a holder of rights to four thousand five hundred acres of land by applications entered in April, 1769, under the Proprietary government of Pennsylvania.

But thrilling and far-reaching events were rapidly approaching to end the participation of the royal Governors of Pennsylvania and Virginia in Colonial affairs. The American revolution was at hand, and while the people who settled in the valleys of the Ohio and Monongahela were partisans of either Virginia or Pennsylvania, as their interests may have influenced them, they were still sufficiently patriotic to unite as brothers to uphold and defend the liberty and independence of the United Colonies against a common foe. Dunmore and Connelly disappear from the scenes of their activities at the outbreak of the revolution, and leave the unsettled and perplexing boundary contention to be determined, after their departure, by the two interested colonies, which are so soon to be endowed with the dignity and honor of free and independent statehood. When the authorities of the two states came to consider the question it was manifest that a much better spirit prevailed. The importance of an early settlement was fully realized by both states, and in December, 1776, the Virginia legislature proposed as an adjustment that the western line of Maryland should be extended northward to the line of the fortieth degree of latitude, and thence westwardly along that parallel "until the distance of five degrees of longitude from the Delaware shall be accomplished." This offer was a marked and generous recession from the demand of Dunmore for all the territory west of Laurel Hill, as it would give to Virginia only a part of the county of Fayette, all of the county of Greene, and a very small corner of the county of Washington, but no formal action was taken by Pennsylvania on this proposition. In the year 1778 another proposition was made by Virginia for the appointment of a joint commission, which proposition was accepted by Pennsylvania the following year. Commissioners were duly appointed by both states, George Bryan, John Ewing and David Rittenhouse on the part of Pennsylvania, and James Madison and Robert Andrews on the part of Virginia, who met

at Baltimore on the 27th day of August, 1779. A number of letters passed between these commissioners, in which the claims of each state was presented with proper dignity and in a commendable spirit. Concessions were made by each, until, on the 31st day of August, the fourth day of their session, an agreement in the following words, practically the settlement of the long pending controversy, was reached:

"We, James Madison and Robert Andrews, commissioners for the state of Virginia, and George Bryan, John Ewing and David Rittenhouse, commissioners for the State of Pennsylvania, do hereby mutually, and in behalf of our respective states, ratify and confirm the following agreement, viz: To extend Mason and Dixon's line due west five degrees of longitude, to be computed from the river Delaware, for the southern boundary of Pennsylvania, and that a meridian drawn from the western extremity thereof to the northern limit of the said State be the western boundary of Pennsylvania forever."

This agreement was ratified by the legislature of Virginia on the 23d of June, 1780, and by the State of Pennsylvania on the 23d of September, following. The acts of both states provided for the appointment of commissioners to run and mark the lines between the states in accordance with the agreement, but, owing to unavoidable circumstances and unexpected hindrances, this work was for a period delayed, and not until 1784 was the southern line from the end of Mason and Dixon's line run out the full five degrees of longitude and the southwestern corner of the State established, after careful astronomical observations by the scientists of the commission. The meridian line from the southwestern corner to the Ohio river was run in 1785, and from the Ohio river to Lake Erie in 1786. The first cause of delay in the running of the lines was the invasion of Virginia by the British army, in 1781, which resulted in considerable derangement and confusion in the affairs of that state; and, next, interference by a number of Virginia partisans, who still claimed allegiance to that state, with Alexander McClean, when that gentleman attempted, in 1782 to establish a temporary line of jurisdiction. This was finally accomplished, and the long standing and, at times, serious boundary contention was ended. From that time until the present the lines then established have marked the boundaries between the respective states.

As heretofore remarked, the territory in dispute was first treated by the Virginians as part of Augusta county, of that state, but it was subsequently divided into three counties, called Ohio, *Manongalia* and Yohogania. A land office, in charge of a surveyor, was established in each county, and, as settlements were encouraged, many rights for lands under Virginia laws were entered and surveyed. In the records of the land department these rights are known as "Virginia Entries,"

and consisted of state, pre-emption, treasury and military warrants. The terms under which lands were held by Virginia rights were fixed in the warrants, but in most of these warrants the purchase money was as low as ten shillings sterling for a hundred acres. The entries number over one thousand, and cover over an area of six hundred and thirty-three thousand acres of land. Upon many of the entries, however, surveys were never made or returned, and, of course, titles to them under Pennsylvania laws never completed. The description of these tracts as they are recorded in the book of entries, and as they are written in the surveys, are quite vague and indefinite, the location usually given being that of a stream, as "on Peter's Creek," "on the waters of the Shirtie (for Chartiers)," "on Pigeon Creek," "on X mile creek," "on Racoon creek," or on the Ohio, Monongalia, or "Yough," as the case might be.

The authorities of Virginia, after the agreement of the boundary commissioners at Baltimore, but before the ratification of the same by the two states, appointed a number of persons to act as commissioners to adjust titles by hearing proofs and granting certificates to claimants to lands on rights acquired under the laws of that state. The appearance of these commissioners on the Monongahela, and their proceedings were the cause of considerable uneasiness and some indignation on the part of Pennsylvanians, who feared that new rights might be granted under Virginia laws, in violation of the agreement, and also that settlers holding under Pennsylvania rights might be dispossessed of their lands by the summary action of these commissioners. An appeal was made to Congress by the Supreme Executive Council, through the Pennsylvania representatives, which resulted in the adoption of the following preamble and resolution in relation to the new contention by that body on the 27th of December, 1779:

"Whereas, It appears to Congress from the representation of the delegates of the State of Pennsylvania that disputes had arisen between the states of Pennsylvania and Virginia relative to the extent of their boundaries, which may probably be productive of serious evils to both states, and tend to lessen their exertions in the common defense, therefore, Resolved, That it be recommended to the contending parties not to grant any part of the disputed land, or to disturb possessions of any persons living thereon, and to avoid every appearance of force until the dispute can be amicably adjusted by both states, or be brought to a just decision by the intervention of Congress: That possession forcibly taken be restored to the original possessors, and things be placed in the situation in which they were at the commencement of the present war without prejudice to the claims of either party."

At the time the above resolution of Congress was passed, the agreement of the boundary commissioners had been ratified and confirmed, and Pennsylvania had unquestionable jurisdiction over the territory so long in dispute. On the following day, however, December 28, 1779, a proclamation was directed to the people of Pennsylvania, signed by Joseph Reed, president of the Supreme Executive Council, by which all officers, civil and military, and others, subjects of the State, were required to pay due obedience and respect to the resolution, but grantees of lands under the State were encouraged "to continue in the cultivation and improvement of their several estates, notwithstanding any claims or pretences set up by the state of Virginia." They were also assured that they would receive "protection and support" while they continued in duty and obedience to the laws and government of the State. The uneasy feeling aroused by the presence of the Virginia commissioners did not cease with the action of Congress in recommending that grants of land should not be made within the disputed district, and in March, 1780, the Supreme Executive Council again passed a series of strong resolutions, with a letter —which reads like a manifesto of war—to the representatives of the State in Congress; but no further attention was given to the matter by Congress. The danger to Pennsylvania rights by the presence of the Virginia agents or commissioners had no doubt been exaggerated, and soon afterward the excitement and bad feeling caused by their presence apparently passed away. Certain it is that nearly all the surveys of Virginia entries now in the land office show that they were made in pursuance of the certificates granted by these commissioners, and were duly recognized and accepted by the land officers of Pennsylvania. Three *fac similie* copies of surveys on file in the Department are herewith given for the purpose of showing the forms of certificates thereto appended. The first tract is situated in Fayette county, near Brownsville. The second, on Peter's creek, in Washington county, on which Cox's fort was located. The third is situated in the last named county, also on Peter's creek, where the town of Finleyville now stands. A fourth draft is given for the purpose of showing the location of Redstone Old Fort, on which the town of Brownsville is built. This last named survey was made under a Pennsylvania right, application No. 3583; entered July 3, 1769.

A land office under the Commonwealth was first established by an act of the Legislature, passed the 9th of April, 1781. The purpose of this act was to enable persons who held unpatented rights to land obtained from the Proprietary government prior to December 10, 1776, to pay such arrearage of purchase money as might be due thereon, and complete their titles by obtaining patents. This act was followed by another on the 5th of April, 1782, which provided for a Board of

Order of Survey No. 3583

Alexander McKean Depty

Property to consist of the President or Vice President of the Supreme Executive Council, a member of the same to be appointed by the Council, the Secretary of the Land Office, the Receiver General and the Surveyor General, whose duty it was made "to hear and deter-"mine in all cases of controversy or caveats, in all matters of diffi-"culty or irregularity touching escheats, warrants on escheats, war-"rants to agree, rights of pre-emption, promises, imperfect titles or "otherwise," which heretofore had arisen, or thereafter might arise, in transacting the business of the land office. The first recorded action taken by this board in relation to Virginia rights was on the 15th of September, 1784, when it was "Resolved, That the Surveyor "General issue his orders forthwith to his deputies in the counties of "Westmoreland, Washington and Fayette, that upon applications "made to them by any persons claiming lands within their districts "respectively by virtue of rights acquired under, founded on, or rec-"ognized by the laws of Virginia, they survey the said lands for such "persons, first giving public notice of the time when such surveys "shall be made." The deputies were further required to make return of such surveys to the Surveyor General, giving copies of the "grants, entries or vouchers" on which the applicant requested the surveys to be made, to note any interferences with rights granted under Pennsylvania, and to make such observations as would be useful for decisions in cases of disputes; and to expedite the determination of disputes they were requested to urge the parties interested to have depositions respecting the tracts taken before a magistrate in the neighborhood, to be transmitted with the returns of surveys and to be present at the taking of such depositions. The deputies were also required to certify whether the lands had been at any time surveyed upon Pennsylvania claims, or whether such lands had been applied for by the applicants or others. There was still considerable delay and trouble in making surveys and adjusting claims under Virginia rights, owing principally to a lack of information on the part of deputy surveyors as to the exact terms of the agreement between the states, and the absence of any official data giving the names of persons really entitled to lands. There were many such persons with a perfect right to apply for surveys, who were anxious to complete their titles by taking out patents under the Commonwealth as soon as possible, and complaints of the delays on the part of the surveyors were not slow in reaching the land office. To remedy this condition the Board of Property, on the 7th of March, 1785, adopted the following resolution: "Resolved, That for "preventing delays upon applications to deputy surveyors by persons "claiming lands in the counties of Westmoreland, Washington and "Fayette, by virtue of rights acquired under, founded on, or recog-"nized by the laws of Virginia, the Surveyor General forthwith fur-"nish his deputies with necessary transcripts of the papers communi-

"cated by the government of Virginia to the Supreme Executive "Council, and by them put into his hands; that he enjoin them to pay "immediate attention to all applications appeared to be supported by "rights obtained as aforesaid before the 23d of June, 1780. That in "returns of all surveys made on such applications they certify "whether the particulars of description mentioned in the original "entries correspond with the lands owned by the applicants. That "where such deputies cannot conveniently attend the taking of depo- "sitions in disputed cases they earnestly require both parties to be "present when they shall be taken in order to avoid the trouble and "expense they must otherwise unavoidably incur, and that to give "facility and dispatch in settling claims aforesaid it be recommended "to the Surveyor General to lessen the districts and appoint a greater "number of deputies, and that in his choice of them he take all pos- "sible care to guard against the appointment of any person in- "fluenced by prejudices upon the subject of such claims."

The land office in Pennsylvania was closed in 1776 after the declaration of independence. When it was again opened in 1781, under the Commonwealth, it was for the purpose, as heretofore remarked, of permitting the completion of titles to lands held under grants from the Proprietary government; and not until the act of April 1, 1784, became a law, was provision made for the sale of the unappropriated lands of the State. For that purpose the office was opened on the 1st of July of that year. It follows that all Pennsylvania claims that conflicted with Virginia rights must have been acquired under the Proprietary government, between the years 1769 and 1776. These rights were under applications entered in 1769, and following that year, after the application system had been abandoned, by warrant and survey. There were instances within the disputed territory where the same lands were granted to different persons by the authorities of each state, but provision was made for such conflicting claims in the acts ratifying the boundary agreement. For the adjustment of such cases it was enacted that in the decision of disputes "preference was to be given to the elder or prior right in which- "ever of the states the same had been acquired, the persons paying, "within whose boundary their land was included, the same purchase "money which would have been due from them to the state under "which they claimed the right, etc." So that a Virginia title, obtained in conformity with the laws of that state, if older than a Pennsylvania title was to be preferred, and vice versa. To the honor of the courts of Pennsylvania it may be said that in all cases tried before them which involved a conflict between Pennsylvania and Virginia titles, the compact between the states was held to be inviolate, and by every consideration of moral and political obligation to be upheld and enforced with fidelity; and to-day within the territory, so long a matter

of earnest contention, land titles are so well settled that there is probably no section of the State, unless in the three original and a few others of the older counties, in which there is less land litigation than in the counties formed out of the disputed district.

An interesting case, growing out of conflicting grants of the same land to different persons by each state, was that of Sims vs. Irvine, decided May 28, 1799, in the Supreme Court of the United States on error from the Circuit Court of Pennsylvania. This case involved the title to Montour's Island, in the Ohio river, a few miles below the city of Pittsburg, now known as Neville Island, or Neville township, Allegheny county, and containing over eight hundred acres of valuable land. At the close of the war between Great Britain and France in 1763, the King of Great Britain by a proclamation "commanded and empowered" the governors of his several colonies and provinces to reward the officers and soldiers who had served in North America to the end of that war with grants of unappropriated land. Under that proclamation a Major William Douglas, an officer of a regiment from the colony of New Jersey, received a right to 5,000 acres, the quantity allotted to a field officer, which right for a valuable consideration (£100), he assigned in 1779 to Charles Sims, a citizen of Virginia. In May, 1780, Sims, as assignee of Douglas, received from the register of the Virginia land office, a military warrant for 5,000 acres, which it was asserted he delivered to the surveyor of Yohagany county, with directions to that officer that it be entered and located in several parcels, one of which was to be Montour's island. The book of Virginia entries in the land department of Pennsylvania contains the following entry: "Charles Syms, Military warrant, 5,000 acres, Racoon." Of these 5,000 acres, 3,002 acres were located on Racoon creek, were regularly surveyed without objection, and in 1794 patented to the said Sims.

The Pennsylvania title for Montour's island was vested in General William Irvine, a distinguished soldier of the revolution, then the commanding officer at Pittsburg, who had rendered valuable service to the State while in that command, and received by an act of the Legislature, passed the 24th day of September, 1783, a pre-emption right. The act is entitled "An act to grant the right of pre-emption to an island, known by the name of Montour's island, in the Ohio river, to Brigadier General William Irvine." The Surveyor General was directed to cause a survey of the island to be made, at the cost of General Irvine, and have the same returned into the land office for confirmation by patent. This was done, and on the 18th of December, 1787, General Irvine, having first paid into the Receiver General's office the sum of two hundred and eighty-three pounds, thirteen shillings and six pence, the cost of the island at the rate of thirty pounds

Pennsylvania currency per hundred acres (eighty cents an acre), received his patent.

A suit in ejectment in the Circuit court of Pennsylvania was then brought against General Irvine by Sims, to recover the island under his military grant. The jury in the court below found a special verdict, in which all the facts in the case, together with all the laws of both states relating to land grants are fully set forth, and on that finding the appeal was taken to the Supreme Court of the United States. One of the objections to the title of Sims was based on the alleged invalidity of the assignment to him by Douglas, under the laws of Virginia, but it was held that a military right to lands "acquired under a royal proclamation in 1763 was assignable, by the laws of Virginia, to an inhabitant of that state." Also that, "obtaining a warrant on such right, and locating it, gave the assignee a complete equitable title, which was confirmed by the compact between Pennsylvania and Virginia." A finding of the jury was that Presley Neville and Matthew Richie, the deputy surveyors for Washington county, had received from the Surveyor General the list of entries which contained an entry for the land claimed by Sims, and that on the 13th of April, 1787, they surveyed Montour's island and returned the survey into the Surveyor General's office, the "return of the survey setting forth that it was made for Charles Sims, assignee of William Douglas, and under the Virginia warrant, entry and location." The fact that a survey had been made and returned was admitted, but, in addition to the general prohibition to surveying islands in the Ohio river, it was objected to on the ground that the defendant had procured an actual survey of the island as early as the year 1783, while the plaintiff never attempted to procure a survey under his right until the year 1787, which survey it was contended, "could not divest the defendant's previous posession." Another objection to the survey of Sims was that the island, being in the Ohio river, formed no part of Washington county, and was not within the limits of the district of the deputy surveyors, and was therefore unauthorized by the laws of Pennsylvania, which confined deputy surveyors to their respective districts. It was, however, held by the court that the survey for Sims was legal. It may be remarked in this connection that the survey to which reference is thus made cannot be found among the records of this department, though there is evidence that such survey was actually made and returned. Other objections were urged against the right of Sims, but the decree of the court was in his favor, and General Irvine was compelled to surrender his title to Montour's island. To indemnify him for his loss the State Legislature gave him a State reservation of 2,000 acres that had been surveyed at the mouth of Harbor creek, on Lake Erie, in the county of Erie.

ASSESSMENTS AND TAXES.

In 1874 the legislature passed the following act:

"The county commissioners of each county of the State, including the board of revision of the city of Philadelphia, shall, upon the first day of June, 1874, and upon the same day annually thereafter, make out, in tabular form, by assessment districts, a full statement of all property taxable for county purposes, showing the real and personal in separate columns, the amount of tax assessed for county purposes, and also the debt of said county, the same to be inclosed by mail to the Secretary of Internal Affairs, at Harrisburg; and in case of refusal or neglect to make such returns, the same may be enforced by mandamus."

Pursuant to the duties imposed by this act, the Secretary of Internal Affairs each year prepares and furnishes the county commissioners with blanks upon which returns are made and filed in this department. When all the data called for in this blank is given, the wealth of the State, so far as it can be ascertained, from the assessed valuation of real estate, is easily determined. The returns show the number of taxables, the number of acres of cleared and timber land, the assessed value of all real estate, the assessed value of real estate exempt from taxation, the assessed value of real estate taxable, number of horses and cattle and value of same, value of salaries and emoluments of office, value of all property taxable for county purposes, aggregate amount of county tax assessed at the rate prevailing in each county, amount of money at interest, value of stages, omnibuses, hacks, etc., together with tabulations showing the aggregate value of property taxable for State purposes at 4 mills on the dollar. To this is added the amount of taxes collected locally for State purposes, and the debt, if any, of each county.

TAXABLES.

The number of taxables in 1891 was 1,532,895; in 1892, 1,576,149; in 1893, 1,662,956; in 1894, 1,684,946; in 1895, 1,774,138. It will be seen from these figures that there has been a gradual increase from 1891 to 1895. A marked increase is noted in the counties of Beaver, Carbon, Clearfield and Philadelphia, and a decrease in the counties of Butler, Dauphin, Fayette, Lebanon and Westmoreland. The increase in Philadelphia from 1894 to 1895 is quite noticeable. In the

former year the number of taxables was 276,977, and in the latter 332,297. When it is understood that the amount of school appropriation received by each municipality and each school district from the State Treasurer is based upon the number of taxables, it will be seen how exceedingly important it is for each school district that the highest return possible be made. This, of late years, has become more important, as a very large amount of money is now appropriated by the Legislature from the State Treasury to be distributed for the support of the common schools of the Commonwealth.

Where there has been a decrease in the number of taxables, it is due probably to the fact that the returns in 1894 were too great, or that the return for 1895 is incomplete. If due to the latter cause, the assessors were probably not mindful of the fact that the amount of appropriation for their school districts will be based upon the number of taxables returned.

CLEARED AND TIMBER LAND.

The blanks referred to also call for a return of the number of acres of cleared and timber land in each assessment district. The data received on this subject varies so from year to year that it is hardly worth while to make comment on the returns. A few years ago in some of the interior counties, whose acreage was largely timber land, there would be but a slight return of cleared land, but twenty years of lumbering and tanning have resulted in removing most of the timber from these counties, and yet the land is not cleared, at least, so far as may be necessary for farming purposes. Nor can it be classified properly as timber land, because all the merchantable timber has been cut away and taken to market. In one assessment district an assessor may consider a tract of land, from which the timber has been cut, as cleared land, although cleared only so far as may be necessary to cut away the timber, while in another district an assessor may treat such a tract as timber land, notwithstanding the timber has been cut and removed. In still another district an assessor may assume that such a tract is neither cleared nor timbered, and make no return of the acreage. This would, perhaps, be more consistent with the facts. The suggestion made on this subject indicates that perhaps the law of 1874 ought to be amended in such a manner that there will be a further classification of real estate with reference to its being cleared or timber land. It was evidently the intention of the Legislature to ascertain from year to year the amount of original forests still standing and what portion of the territory of the State had been made into farms. It is certain that a great portion of the acreage of the interior counties is not now either cleared or timber land, but is growing up with a second growth, and is not being used in any way.

A classification of the acreage of the State which would show the amount of farm land, the amount of forest and the amount of land unused, would probably give information of some value; but it is submitted that no reliance can be placed upon the returns of the county commissioners, as made at present, of the acreage of cleared and timber land, as contained in the consolidated tables of this report.

In 1891, the number of acres of cleared land reported was 12,324,742; in 1891, 15,574,295; in 1893, 14,872,864; in 1894, 15,081,061; in 1895, 16,120,727, and the number of acres of timber land was reported in 1891 at 7,662,549; in 1892, 8,369,142; in 1893, 8,296,112; in 1894, 8,417,327; in 1895, 9,085,318. It will be seen from these figures that there has been a marked increase in the number of acres of timber land since 1891; but the truth of this statement will not be borne out by the facts, for it is certain that here has been no increase in the acreage of timber land, but, on the contrary, a marked decrease. The hewing down of the native forests, which has been going on so rapidly for the last two decades, has taken from the Commonwealth a very large percentage of its timber growth. These figures representing the number of acres of timber land are a commentary of nor a very complimentary nature on the method employed by the assessors in different sections of the Commonwealth in making their returns to the boards of commissioners.

In the county of Cambria the returns for 1894 show 72,256 acres of timber land, while the returns for 1895 show 289,737 acres. In Clearfield county the returns for 1894 show 231,458 acres, and in 1895, 468,996 acres. In the latter county, where the timber is being rapidly cut away and only a fractional portion of the original forests still remains, it would be falsifying the facts to claim that in the year 1895 there was twice as much timber land as in 1894. Certainly the acreage would be less. A similar condition exists in old Cumberland, where, in 1894, the acreage of timber land was reported at 40,057 acres, and in 1895, at 72,505 acres. In Venango county, in 1894, there were 166,096 acres, and in 1895, 210,504 acres. These are some of the glaring errors manifest upon these returns and further comment upon the disparities is unnecessary. It is clearly seen that they are far short of representing the facts. In 1894, the counties of Allegheny, Beaver, Delaware, Greene, Luzerne, Philadelphia and Schuylkill made no return of cleared land. In 1895 all the counties, except Delaware, Greene and Philadelphia made returns. In 1894, Allegheny, Beaver, Delaware, Greene, Luzerne, Philadelphia and Schuylkill made no return of timber land. In 1895 all the counties made returns except Delaware, Greene and Philadelphia.

VALUE OF ALL REAL ESTATE.

All the counties in 1894 and 1895 made returns of the value of all real estate. In 1894, the amount was $2,634,601,500; in 1895, $2,741,938,849. It is understood that these estimates are based upon the assessed value as returned from the several districts of the Commonwealth, and the amounts so given include the real estate exempt from taxation. Five years ago the valuation was given at $2,256,151,310. It will, therefore, be seen that there has been an increase of about five hundred millions. An Allegheny county, in 1894, the valuation was $443,701,549; in 1895, $496,942,325. Philadelphia shows an increase of about eighteen million dollars, and Westmoreland county of about nineteen million dollars. Marked decreases are noted in the counties of Cameron, Chester, Cumberland, Greene, Jefferson, Northampton, Perry and Washington. In most of the counties there is a fair increase. Where there are remarkable increases, especially in the rural counties, the changes are probably largely due to incomplete returns. This is particularly true where there are reductions, for it is not presumed that there would be a decrease in the value of real estate in any county from the valuation of 1894, as in that year real estate was very low.

VALUE OF REAL ESTATE EXEMPT FROM TAXATION.

In 1891, the value of real estate exempt from taxation was $153,814,427; in 1892, $234,801,553; in 1893, $239,243,753; in 1894, $245,368,752; in 1895, $270,920,645. The counties of Fulton and McKean made no returns in 1894 and 1895. There can be no room for doubt about the failure of the assessors in these counties to make proper returns for it cannot be assumed that these counties have no churches, schools or municipal property which is not subject to taxation. In other counties than these it is certain that there have been incomplete returns, for $270,920,645, does not even approach the great amount of money invested in church, school, municipal, and other property not subject to taxation.

VALUE OF REAL ESTATE TAXABLE.

In 1891, the value of real estate taxable was reported at $2,092,336,883; in 1892, $2,308,767,431; in 1893, $2,351,190,037; in 1894, $2,389,232,748; in 1895, $2,471,018,204, showing an increase in five years of $378,681,321, and from 1894 to 1895 of $81,785,456.

Two years ago the department made an investigation to ascertain how far the assessed valuation approached the actual valuation of real estate. In some counties it was found that there was an honest effort on the part of the commissioners and the assessors to comply

with the law and assess property at such a valuation as it would sell for if exposed to public sale, after due notice having been given of the purpose to sell. In other words, there was a fair approach to the actual valuation as contemplated by the law which provides for the assessment. In other counties there was a rule well established and of long standing that the assessed valuation should be fixed at about twenty to twenty-five per cent. of the actual valuation. In other counties similar practice fixed it at fifty per cent. of actual valuation. The utter disregard of the obligations imposed upon county commissioners and assessors is thus seen and their complete failure to comply with the clear mandates of the law providing for the ascertaining of the value of real estate for the purpose of taxation must be admitted.

This investigation showed that the real estate of the Commonwealth was assessed for taxes at not more than fifty or fifty-five per cent. of its actual value. Therefore, when the returns of 1895 show an assessed valuation of $2,471,018,204, it must not be assumed that these figures represent anything like the actual value of real estate subject to taxation. In all probability $5,000,000,000 would be nearer the actual value. These figures are significant, however, when compared with the total wealth of the country, which is estimated at $65,000,000,000.

For many years the tax reformers have been trying to mature plans to compel an honest and fair assessment of real estate for the purpose of taxation, and the efforts that have been made are certainly to be commended, for it is a fact that there are irregularities, inconsistencies and acts committed in the assessment of real estate that are little less than fraud, the inevitable result of which is to produce inequalities in the payment of taxes. That is, through favoritism, neglect of duty, or other methods, one man is exempted from paying the amount of tax which he should pay on his real estate, while another man, perhaps a neighbor, is compelled to pay more than in equity he should be required to pay. In a great majority of the assessment districts of the Commonwealth property owners forget political affiliations when electing assessors, and the property owner is strongly induced to vote for the assessor he may think will best serve his interests in making up the return of the district in which his real estate is situated. No feasible plan seems yet to have been perfected by those interested in the tax laws which seems to be an improvement on the present system. It is conceded on all sides that the law as it now exists is equitable, and the only failure consists in the manner in which it is executed. It is almost universally disregarded by those whose duty it is faithfully to execute it. More fidelity in the discharge of public duties would produce the desired results. This is a sad commentary to make, in

view of the fact that every assessor and all the members of the boards of county commissioners throughout the Commonwealth have sworn to discharge faithfully the duties incumbent upon them in their offices. Favoritisms, however, are bound to creep in, and it requires a sturdy man, with resolute purpose, to stand the onslaught of the property owner who through one device or another seeks to have a low valuation placed on his property, in order that he may be relieved to some extent of the share he should bear of the burden of public taxation.

Governments are instituted for the good of all citizens, and the expense of maintaining the government should be borne by public taxation falling equitably upon all citizens, and where there is a failure to have taxes so adjusted as to be equitable, there is a failure to do justice, and, consequently, a cause for complaint on the part of those against whom discriminations are made. Under such conditions there are those who escape the payment of their fair share of taxes, and the amount thus thrown from their shoulders is cast upon others who are obliged to pay more than their share.

NUMBER AND VALUE OF HORSES, MARES, GELDINGS AND MULES OVER THE AGE OF FOUR YEARS.

In 1891 the number of horses, etc., reported was 506,988, and the value was given as $32,777,460; in 1892, the number was 544,910, and the value, $33,361,391; in 1893, the number was 561,368, and the value, $32,585,620; in 1894, the number was 550,134, and the value $30,162,309; in 1895, the number was 576,767, and the value $25,403,400. While there was a slight increase from 1891 to 1895 in the number of animals there has been a decrease in value of about $7,000,000. It is a fact that the price of these animals has greatly decreased in the past five years, and to this extent at least these returns represent the facts. Of the causes that have led to the decrease in the value of these animals, the most prominent is the introduction of electricity which has, in recent years, largely displaced the horse as a motive power for street cars in the cities and on local lines. This, of itself, has been sufficient to materially decrease the demand for horses and consequently lessen their value.

NUMBER AND VALUE OF NEAT CATTLE OVER THE AGE OF FOUR YEARS.

Under this classification of personal property we find that in 1891 the number was 654,338, and the value $12,423,333; in 1892, the number was 707,995, and the value $12,384,879; in 1893, the number was 692,259, and the value $12,148,429; in 1894, the number was 672,023, and the value $11,565,283; in 1895 the number was 667,788, and the value $11,660,891.

These figures show a slight decrease in the number from 1894 to 1895, but a slight increase in the value. Comparing the figures for 1895 with those of 1891 we find an increase in the number of 13,450, and a decrease in the value of $762,442. It may seem out of place to attack these figures, but it is hard to believe that in the last five years there has not been a greater increase in the number of these cattle. Probably there has been a decrease in the value of neat cattle, but if the facts could be clearly known as to the dairy productions of the Commonwealth, it would certainly be demonstrated that there has been a greater percentage of increase in the dairy products than in the number of neat cattle. Recent legislation may give some relief to the owners of this species of personal property. One of the State departments has been thoroughly reorganized, with the view of preventing in the Commonwealth the sale of oleomargarine, and if this is successful, it will undoubtedly result in making the manufacture of butter and cheese more profitable, and result in increasing not only the number of neat cattle, but also their valuation, a condition certainly to be desired, as during the past five years their value seems to have been decreasing.

VALUE OF SALARIES, EMOLUMENTS OF OFFICE, POSTS OF PROFIT, PROFESSIONS, TRADES AND OCCUPATIONS.

In 1891, the total amount returned under this head was $79,204,079; in 1892, $104,881,902; in 1893, $111,014,967; in 1894, $114,414,918; in 1895, $112,827,751. While there appear to be a marked decrease in the valuations from 1894 to 1895, there is a noticeable increase from 1891 to 1895, the increase in that time being about thirty-two millions of dollars. These figures no doubt fall far short of giving the actual valuation existing under this classification, owing to under-valuations and to the fact that for none of the years has either Lancaster or Philadelphia county made any return.

AGGREGATE VALUE OF ALL THE PROPERTY TAXABLE FOR COUNTY PURPOSES.

In addition to the real estate assessed for taxation, which amounts to something over two billions of dollars, there are other species of property subject to county taxation. The total value of property taxable for county purposes in 1891 was $2,216,903,213; in 1892, $2,459,538,840; in 1892, $2,507,066,937; in 1894, $2,545,500,738; in 1895, $2,621,047,121. There has been a gradual increase from 1891 to 1895. It may be said that the same inequalities that exist with reference to the assessed valuation of real estate for taxable purposes undoubtedly exist with reference to other property under this heading subject to tax for county purposes. Whether personal property is undervalued to the same extent that real estate is, is a matter solely of conjecture, but it may be presumed that the percentage of

assessed valuation of personal property to actual valuation is about the same as the percentage of assessed valuation to actual valuation of real estate. All the counties appear to have made complete returns under this heading. Among the counties showing a marked increase are Allegheny, Clearfield, Erie, Lackawanna, Philadelphia, Carbon and Westmoreland; those showing a decrease are Chester, Northampton, Northumberland, Perry, Schuylkill and Washington.

AGGREGATE AMOUNT OF COUNTY TAXES ASSESSED.

An important feature of the assessment returns is that made by the county commissioners, which relates to amount and rate of taxes for county purposes. It is interesting to know what changes are made each year in the way of economies in maintaining county governments. This is manifest in the changes that occur year after year in the rate and amount of taxation. In 1891, the aggregate amount of taxes assessed was $18,250,660.87; in 1892, $19,829,680.78; in 1893, $18,851,798.73; in 1894, $19,935,994.04; in 1895, $20,387,168.08. It is understood that the rate or millage in each county is fixed by the respective boards of county commissioners, and that large burdens of indebtedness necessitate a high millage in the levy of taxes for county purposes. Counties that are out of debt and whose county expenses are light, have a low rate of taxation; but where different conditions exist, such as great bonded indebtedness, large expenditures for the support of the poor and for the maintenance of expensive bridges, the rate of taxation is high. Notwithstanding the different conditions that exist in the several counties, the increase in the total amount of taxes each year since 1891 has been uniform. Some of the counties that a few years ago had a high rate, have evidently paid their indebtedness and are, therefore, no longer required to pay a large interest account. In such counties we discover a reduction of the rate of taxation, and in some cases a reduction of the total amount levied.

In Allegheny county, for 1894, the aggregate amount of taxes assessed for county purposes was $891,111.81, and in 1895, $955,513.53. Marked increases are also found in the counties of Armstrong, Beaver, Bradford, Clearfield, Cambria, Dauphin, Erie, Huntingdon, Indiana, Jefferson, Juniata, Lackawanna, Lawrence, Luzerne, Mercer, Montour, Northumberland, Perry, Philadelphia, Schuylkill, Somerset, Tioga and Westmoreland. Large decreases are found in Berks, Bucks, Butler, Chester, Clarion, Columbia, Cumberland, Greene, Lycoming, Northampton, Union, Washington and York. All the counties having made complete returns on this subject, it may be presumed that $20,387,168.08 is a close approximation of the amount expended in 1895 for the maintenance of the several county governments of the Commonwealth.

AMOUNT OF MONEY AT INTEREST, INCLUDING MORTGAGES, JUDGMENTS, BONDS, NOTES, STOCKS, ETC.

The inequalities that exist in the assessment of real estate for taxation, and the wrongs that result therefrom have their parallel in the failure to assess money at interest, as required by the laws of the Commonwealth. A few years ago the rate of money at interest was three mills per annum, the rate now is four mills, and it is a fact that the Legislature, in 1885, and subsequently, furnished such machinery as was thought necessary to compel full returns of money at interest, so that no one should escape a fair share of the burden of State taxation, as this species of property alone is subjected to taxation for the support of the State government. No one who is conversant with the financial affairs of the people of Pennsylvania, or who is a close observer of financial matters, can fail to see that there is a failure to properly execute the law in regard to the taxation of money at interest. In 1891 there was $579,036,227 returned as subject to taxation; in 1892, $590,882,560; in 1893, $607,664,408; in 1894, $616,043,452; in 1895, $620,020,507. What percentage this amount bears to the actual amount at interest and upon which the State should receive four mills per dollar per annum, as taxation, cannot be ascertained, but that many millions of dollars of this species of property escape taxation is beyond the slightest doubt. In many states extreme penalties are imposed for the failure to make return of the money at interest for taxation. It is advocated in some quarters that a failure to make such return should work a forfeiture of the obligation showing the indebtedness upon which interest is paid. Others claim that a person should be estopped from collecting interest on such money, and still others, that a failure to make such return should be declared a misdemeanor. Extreme measures have never been adopted in Pennsylvania to compel complete returns of money at interest, but it is admitted on all sides that there is much to do in the way of important legislation and in educating the people of the Commonwealth up to a point of stricter accountability, if not to lift them to a higher plane of honesty and integrity, in order that the tax laws may rest with equity upon all persons.

VALUE OF STAGES, OMNIBUSES, HACKS, CABS, ETC.

Severe as may have been the criticisms in regard to the returns of the assessed valuation of real estate and the failure to make proper return of the amount of money at interest taxable for State purposes, more severe terms are required to characterize the acts of the assessors in regard to their returns of the value of stages, omnibuses, hacks, etc. This species of personal property is made the subject of taxation for State purposes. There is a large amount

of money invested in this property, and yet the amount returned in some counties is so trifling as to be hardly worthy of mention. In 1891 the total amount returned was $636,667; in 1892, $627,179; in 1893, $508,204; in 1894, $570,061; in 1895, $554,467. These figures show that the value of this kind of property was several thousand dollars less in 1895 than it was in 1891, but it is not believed that this is a true representation of the facts. In the county of Allegheny, where there are hundred of thousands of dollars invested in this species of property, less than one hundred thousand dollars was returned. In Berks no return was made for 1894, and only $7,040 returned in 1895. Cameron county, while it has several stage lines, makes no return at all. Dauphin county, in 1894, with its numerous stages, hacks, etc., returned only $685, but there seems to have been something of a gain as the returns for 1895 show $4,945. Huntingdon county returns only $520. This class of property seems to have largely disappeared from Lackawanna county between the years 1894 and 1895, as in the former year the returns showed $21,535, and in the latter but $11,379. These figures are a commentary of not a very complimentary nature on the manner in which assessments of this class of property are made in Lackawanna county. With the growth of Scranton alone, there would certainly be an increase in the amount of money invested in this property. Notwithstanding the assessors are sworn faithfully to discharge their duty, they returned in 1895 only about half the amount returned in 1894. Snyder county, in 1894, returned $150, but in 1895 the assessors failed to find a vehicle upon which to make a return. Sullivan county, in 1894, seems to have had no property of this kind, but in 1895 makes a return of $60. There can be scarcely a comment made on this particular subject of taxation, as returned by the several boards of county commissioners, that does not reflect in a most unfavorable manner on the assessors and shows shiftlessness in the execution of the tax laws. Recklessness and disregard of duty seem to characterize the assessors and commissioners in making returns, so far, at least, as they relate to this species of property.

AGGREGATE VALUE OF PROPERTY TAXABLE FOR STATE PURPOSES AT THE RATE OF FOUR MILLS ON THE DOLLAR, INCLUDING MONEY AT INTEREST, STAGES, OMNIBUSES, ETC.

The revenues of the Commonwealth are almost entirely derived from the taxes received from the numerous classes of corporations. Many years ago the real estate owned by farmers and others was subject to taxation for State purposes. There were then fewer corporations than now and corporate interests represented by thousands are now represented by millions. As a result of this condi-

tion there has been a rapid increase in the amount of taxes from year to year derived from corporations. The law imposing a tax upon real estate for State purposes was repealed several years ago, and instead of taxes flowing from the county and local treasuries into the State Treasury, many millions are now appropriated by the State for the support of common schools, and local governments are financially assisted in other ways. So great has become the receipts of the State from the multiplying of corporations and their vast capitalization, that the State charitable institutions and private charities are nearly all maintained by direct appropriation from the State. The result of necessity has been to lessen the local burdens of taxation and leave the farm and other private enterprises subject to a lower rate of taxation than prevailed in the early years of the history of the State. One subject, however, still remains taxable for State purposes, and that is money at interest. Many efforts have been made by some classes to tax money at interest for local purposes, but wisdom seems to indicate that such a policy would be injurious to the financial interests not only of the State, but of each locality, as in one county money might be assessed at, say, two mills on the dollar, and in another at nine mills, and the inevitable result of such a system would be to drive the money out of localities where it was taxed at a high rate into localities where a low rate is levied, or drive it beyond the limits of the Commonwealth. The only true way seems to be that if money is to be taxed at all, it should be under general laws of the Commonwealth and for State purposes only, as then in whatever county the investment is made it will be liable to the same millage of taxation.

Under this head of taxation the State received, in 1891, $1,748,448.66; in 1892, $2,365,989.61; in 1893, $2,433,011.84; in 1894 $2,466,451.31; in 1895, $2,482,507.52.

A great increase is noted in the amount reported from Allegheny county. In 1894, the amount was $293,072.78, and in 1895, $303,449.54. A considerable increase is also shown in the counties of Carbon, Centre, Chester, Cumberland, Lackawanna, Lawrence, Northampton and Philadelphia. Large decreases are shown in the counties of Armstrong, Beaver, Bedford, Berks, Blair, Clarion, Clearfield, Crawford, Dauphin, Delaware, Erie, Fayette, Perry, Schuylkill, Warren and Westmoreland. The increase in State taxes from 1894 to 1895 on this class of property is $16,056.21. Of the total amount of taxes paid on this class of property in 1895, to wit: $2,482,507.52, $1,238,827.93 was paid by the county of Philadelphia.

COUNTY DEBT.

The total amount of county indebtedness reported is $62,937,468.01, Allegheny county reporting $3,659,058.77 and Philadelphia $53,911,338.98. The counties reporting no debt are Bradford, Bucks, Butler, Centre, Clarion, Cumberland, Erie, Franklin, Greene, Lackawanna, Lawrence, Lehigh, McKean, Northampton, Somerset, Susquehanna, Venango, Washington and Wyoming. Lackawanna county, which reports no debt this year, had a debt of $160,000 last year, and Somerset and McKean counties, which last year reported, respectively, $5,500 and $33,000, make no return of indebtedness this year. It is a satisfaction to know that the counties that were free from debt last year are still out of debt, as appears from their reports for the present year. The counties that have increased their indebtedness during the year are Bedford, Blair, Cameron, Carbon, Crawford, Elk, Fulton, Jefferson, Juniata, Lancaster, Lycoming, Mercer, Northumberland, Perry, Potter, Tioga and Union. All the other counties either maintain the same indebtedness or have reduced the amount. The total amount of county indebtedness reported in 1891 was $84,773,192.42; in 1892, $63,602,502.43; in 1893, $63,982,537.24; in 1894, $63,743,368.40; in 1895, $62,937,468.01. The indebtedness of the counties of the Commonwealth, when the value of property taxable for county purposes is considered, is by no means a great burden, although some of the counties have a heavy load to carry in the way of bonded indebtedness. The tendency for years has been to reduce the amount of indebtedness, and where there has been a material increase in the assessed valuation of property liable to taxation for county purposes, there has not been usually a corresponding increase in the amount of county debt.

The information referred to in these observations under the several headings is tabulated and published in Part II of the annual report immediately preceding the tabulations referring to the total amount of taxes collected for all purposes. A comparison of these tables with tables of former years will be of interest to those who have made or who are now making an investigation of the assessment of real and personal property for the purpose of taxation. No one who has not made a study of the data contained in this report and in previous reports of this department will be prepared to make a proper recommendation to the Legislature with a view of equalizing the burdens of taxation.

TAXES.

The Legislature of 1889 passed a law which had for its object the collection of statistics relating to the taxes paid by the people of Pennsylvania for the maintenance of State, county, city, borough and township governments. The law was general in its terms, including taxes of all kinds except those of a special nature, such as the tax levied in municipalities upon property for the improvement of the streets along which such property is located. It is also evident that the Legislature intended to make an exception of assessments made in municipalities for general sewer systems. A careful reading of the act convinces one that it was intended to include all taxes of a general nature—such as apply to all the citizens of a county, city, borough or township. The act also requires the collection and compiling of statistics regarding the amount of licenses of all kinds paid by the people of the Commonwealth, including liquor licenses. In accordance with the provisions of this act, blanks have each year been furnished the boards of county commissioners upon which the returns are consolidated, compiled and returned to this department. The blank as now used is divided into two divisions. The first shows the amount of taxes collected for all purposes, and is sub-divided as follows:

1. Taxes collected for the support of the poor.
2. Taxes collected for the construction and repair of streets, roads and bridges.
3. Taxes collected for school purposes, not including any appropriation received from the State.
4. Taxes collected for any purpose not embraced in the preceding sub-divisions.
5. Total amount of taxes collected for all purposes, as set forth in the four preceding sub-divisions.

The second division of the blank provides for the return of taxes collected from particular subjects of taxtion, and is sub-divided as follows:

1. Taxes collected on personal property.
2. Taxes collected on occupations.
3. Licenses.
4. Taxes collected on real estate of railway corporations.
5. Taxes collected on real estate of corporations other than railways, including limited partnerships.

The object of the Legislature in enacting this law was evidently to obtain statistics that could be used in arriving at a more equitable plan of taxation, both State and local. Until the present year, the returns made by the county commissioners have been somewhat incomplete, and yet the information obtained has been used to great advantage in adjusting and revising legislation on this subject, and it is also of considerable interest and importance to the people of the Commonwealth generally. For the past four or five years they have been so nearly complete that it is not difficult to approximate the amount of taxes collected for all the purposes indicated, basing same on the number of taxables or on the assessed valuation of property, as returned by the county commissioners to this department. For instance, last year all the counties reported except Carbon, Greene, Schuylkill and Tioga. Having ascertained the total amount of taxes collected in the sixty-three counties reporting, and having ascertained the number of taxables in the State, and the total assessed valuation of real estate, it is comparatively easy to determine approximately what proportion of the tax has been collected in the four counties named. The total amount is thus fairly well determined, and the data is reliable enough to be used as a basis for predicating laws on the important matter of taxation. The returns for 1895 are so complete that there is now but little question as to the exact amount of tax levied and collected for the purposes indicated. Only one county failed to report in 1895—Schuylkill, and, unfortunately for this county, its absence from the list makes it very conspicuous in our report; so conspicuous, in fact, that it is hoped the authorities of the county upon whom certain duties are imposed by the act referred to will see that a proper report is made for 1896, and thus remove the discredit which now attaches to that county.

TAXES COLLECTED FOR THE SUPPORT OF THE POOR.

By examination of the consolidated returns we find the total amount of taxes collected for the support of the poor was $1,593,755.93. This amount is levied and collected directly, and does not include all the money expended for the purpose. In several counties the poor are maintained largely in almshouses owned by the counties, and the money necessary for their support is obtained by requisition of the boards of directors on the county commissioners. No separate tax is levied in such cases for poor purposes, the amount necessary being derived through the levy of the county commissioners for the general support of the county. The counties that have almshouses supported in this way are Adams, Beaver, Bedford, Berks, Blair, Bucks, Cambria, Chester, Clearfield, Cumberland, Dauphin, Delaware, Erie, Fayette, Franklin, Greene, Huntingdon, Lan-

caster, Lebanon, Lehigh, Mercer, Mifflin, Montgomery, Northampton, Perry, Somerset, Tioga, Warren, Washington, Westmoreland and York. There was appropriated last year from the county treasuries for the support of the poor in these counties, $742,664.06, which, added to the amount collected directly, $1,593,755.93, makes the total $2,336,419.99.

TAXES COLLECTED FOR THE CONSTRUCTION AND REPAIR OF STREETS, ROADS AND BRIDGES.

Most of the money expended under this sub-division is derived from direct taxation. The amount collected for the year was $9,019,185.77. In some counties there are appropriations for this purpose made from the money collected for general purposes. For instance, in some cases where bridges span rivers or other streams which are boundary lines between two counties, the bridges are maintained by the two counties. Similar conditions exist with reference to some roads in the Commonwealth, and we find the amount appropriated in such cases to be $325,472.24, which, added to the amount above referred to, makes a total of $9,344,658.01.

TAXES COLLECTED FOR THE SUPPORT OF THE COMMON SCHOOLS.

In the sixty-six counties making report it is found that the common schools have made necessary the levy and collection of $11,930,907.91. This, of course, does not include the amount received by the school districts direct from the State Treasurer.

TAXES COLLECTED FOR OTHER PURPOSES THAN THE SUPPORT OF THE POOR, MAINTENANCE OF STREETS, ROADS AND BRIDGES, AND THE SUPPORT OF THE COMMON SCHOOLS.

The amount of taxes collected for purposes other than those already mentioned was $25,373,290.87. This includes the amount expended by the several boards of county commissioners for the support of the county governments.

TAXES COLLECTED FOR ALL PURPOSES.

The sixty-six counties making report collected $47,917,140.48 during the year.

In considering these figures it must be understood that they do not in all cases indicate the actual amount of taxes collected. In some cases the commissioners find it difficult to get the assessors and treasurers of the different districts to make returns, or at least satisfactory returns of the data called for in the act authorizing the collection of these statistics. When no satisfactory return is received, the commissioners having determined the millage levied for all purposes in such districts make a calculation from the as-

sessed valuation of taxable property. By this plan substantially correct figures are arrived at, except that no allowance is made for exonerations. Having ascertained the total amount in the sixty-six counties to be $47,917,140.48, and having regard to the total assessed valuation of property in the State taxable for county purposes, and having ascertained the assessed valuation of such property in Schuylkill county (the only county not reporting), we find $48,456,334.34 is a very close approximation to the total amount collected for all purposes.

TAXES ON PERSONAL PROPERTY.

Under special subjects of taxation we find that personal property has been made to pay the sum of $2,733,279.33, and that on occupations there have been collected taxes to the amount of $1,084,828.60.

LICENSES.

The total amount received from licenses was $4,943,937.65. Of this large amount Philadelphia collected $2,484,181.56, and the county of Allegheny $993,898.26. A large percentage of the money derived from licenses is received through the high license system now in vogue in this State.

TAXES COLLECTED ON THE REAL ESTATE OF RAILWAY CORPORATIONS.

The real estate owned by railway corporations necessary for their use in the operation and maintenance of their lines is not taxable for local purposes. Its ownership being represented through the capital stock of the corporations, taxes are paid directly into the State Treasury. The amount, therefore, returned under this head as collected on the real estate of railway corporations may be presumed to have been derived from the real estate owned by the corportation but not necessary in the operation and maintenance of their lines. Exceptions to this rule exist in the cities of Philadelphia and Pittsburgh, where, under special laws, all real estate of railway corporations is subject to taxation for certain local purposes. The total amount of taxes received under this head during the year was $741,293.66.

TAXES COLLECTED ON THE REAL ESTATE OF CORPORATIONS OTHER THAN RAILWAYS.

Under this classification there are also many corporations that own real estate necessary in the transaction of their business, and, it is, therefore, not liable to local taxation. The tax on this real estate, as in the case of the railways, is paid directly into the State Treasury. Such real estate, however, as is not necessary for the

operation and maintenance of their business is taxed for local purposes. The amount of taxes on such property is returned for the year at $1,863,835.41.

Whether or not the data obtained this year will ever be used by the Legislature in its alleged efforts to equalize taxation we are unable to say, but the information is of an important character, and, while it cannot be relied upon in all respects as absolutely correct, it will be of interest and value to all persons who are making a study of the subject of taxtion, or who are desirous of knowing how much the people of Pennsylvania pay for the maintenance of the State, county, city, borough and township governments. It will also enable them to make comparisons with the conditions existing in other states, with a view of ascertaining the relative burdens of taxation.

It is a question now whether the purposes of the act of 1889 have not been accomplished and, if so, it would seem proper that the Legislature, at its next session, should repeal the measure. If, as alleged at the time of the passage of the act, its object was to obtain data necessary for a proper and equitable adjustment of the tax laws of the Commonwealth, it is doubtful whether the information should be collected from year to year for statistical purposes alone. It costs the State about $5,000 a year to collect the data, besides the expenses incurred in the several counties and townships in collecting and compiling the returns for this department. Undoubtedly, the county commissioners and other officers upon whom certain duties are imposed by this act would be glad to be relieved of the care and annoyance incident to the execution of this law, and if the purposes for which it was enacted have been accomplished, we can see no reason why a bill should not be introduced at the next session of the Legislature for its repeal.

THE BUREAU OF INDUSTRIAL STATISTICS.

The annual report of this bureau is bound separately and is known as Part III of the reports of the Department of Internal Affairs.

The report for 1895 is one of more than ordinary interest, inasmuch as it contains a history of the rapidly developing industry of tin plate manufacture, tracing it through all its early history, showing the difficulties which were first encountered and its present assumed importance as a leading American industry. Full details of manufacture, with minuteness of description, are given, following every process until the steel billet, the product of American ores, becomes American tin plate. Numerous carefully prepared plates are shown, taken for this report from the New Castle Steel and Tin Plate Company's works, at New Castle, one of the largest and most complete plants, if not the largest, in the world. The report also contains tabulated returns from all the tin plate plants in the State, showing the number of men employed during the year, the aggregate amount of wages paid, total output and total value.

The manufacture of silk is also fully covered, and the report shows its wonderful growth in Pennsylvania. By personal visitation, an effort has been made to show, not only the number of employes, whether male or female, adult or children, their total wages, nature and quantity of goods manufactured and their value, but the growth of each plant in capacity and improved appliances from the date of establishment to the present time.

The securing of statistics from year to year from the same manufacturing establishments is continued this year, and interesting comparisons and deductions are made. These returns are from the leading industries of the State, and are from a sufficient number of each to be fairly representative. Valuable information is drawn from them.

An effort has also been made, and we believe with a large degree of success, to secure statistics as to the number of men employed, wages paid and value of product from the entire iron and steel manufactories of the Stae, and from these returns some important conclusions have been drawn.

The collation of statistics relative to strikes is continued in this report, and a brief history of those occurring in 1895 is given.

Added to the statistical information of the report, is a directory of the industries of the State by counties. No effort was made to classify this work beyond locating the industries in their respective counties. That an undertaking of this kind, unless the result of a special census, should fail of entire completeness, will readily be seen, but we publish it with the assurance that is substantially covers the industries of the State, and that it will prove of value and interest.

BUREAU OF RAILWAYS.

Annual reports of steam and street railways, canal, telegraph and telephone companies are made to the Department of Internal Affairs and are published as Part IV of the department reports. They are made to cover the fiscal year ending June 30, and embrace interesting data regarding the affairs of these corporations, including capitalization, cost of road and equipment, cost of operation, amount of tonnage, mileage, number of passengers carried, bonded and funded indebtedness, receipts, expenditures, dividends, etc. In most of the states commissioners are appointed who have similar supervision over the affairs of railways to that exercised by the Secretary of Internal Affairs under the constitution and law. The Legislature of Pennsylvania, however, has never made provision for the satisfactory supervision of railway interests of this State, although the ground work thereof is provided for in the constitution. A separate bureau was established in 1887, when the Department of Internal Affairs was re-organized, and the work of investigating complaints, securing reports, compiling data and publishing annual reports is performed by the superintendent of said bureau, assisted by two clerks. For a proper discharge of the duties the law should provide additional means and sufficient clerical assistance, to ensure a proper execution of the laws and make it possible to publish a report in regard to the railway interests of Pennsylvania that would be more in keeping with the vast interests involved in the railways of this State. There is no state in the Union where a greater capitalization is invested or where railway interests are so vast. During the session of 1895 an act was passed making the Deputy Secretary of Internal Affairs ex-officio superintendent of the Bureau of Railways.

MINE INSPECTORS.

There are eight anthracite inspection districts and ten bituminous inspection districts in the Commonwealth, in each of which a mine inspector is appointed who, to a considerable extent, is given supervision over the interests of his particular district. Annual reports are made by the inspectors to this department, which are compiled and tabulated and published as Part V of the department reports. While these reports may not be of general interest to the public, they are of great importance to those directly or indirectly interested in the mining industry, particualrly those employed in the mines. The mining laws of Pennsylvania are enacted with a view of having adopted all the safety appliances and means of preventing injury and loss of life, but with all the legislation there are still thousands of persons killed and injured annually in the mines of the State. While it is a fact probably beyond dispute, that legislation has been the means of preventing many accidents, there is still much opportunity for improvement, and with the recommendations annually made by the inspectors it is hoped that more effective legislation may be passed in the future and that those who are engaged in this perilous vocation will, so far as possible, be protected in the performance of their work.

The Secretary of Internal Affairs issues certificates of qualification to those who have qualified under the law as mine foremen and assistant mine foremen. Examination boards have been established and the examinations are, no doubt, carefully made. During the year 121 mine foremen certificates and 85 assistant mine foremen certificates were issued.

The Legislature of 1895 passed a concurrent resolution requiring the Secretary of Internal Affairs to publish each year, with the mine inspectors' reports, the laws regulating the mining of coal. These laws for the first time will appear in the report this year.

PART II.

ASSESSMENTS AND TAXES.

ASSESSMENT REPORTS.

The following Returns made by the Commissioners of the Several Counties of the Commonwealth, to the Secretary of Internal Affairs, for the Year 1895, Show the Number of Taxables, the Number of Acres of Cleared and Timber Land, and the Amount at which all the Real and Personal Property, and all Matter and Things made Taxable by the Laws of this Commonwealth, were Valued, and the Amount of Taxes Assessed thereon for State and County Purposes, in the Various Assessment Districts of the Commonwealth, made Pursuant to the Several Acts of Assembly Relating Thereto.

ADAMS COUNTY.

Names of Assessment Districts.	Taxables.	Cleared land.	Timber land.	Value of all real estate.	Value of real estate exempt from taxation.	Value of real estate taxable.	Number and value of horses, mares, geldings and mules over the age of four years.		Number and value of neat cattle over the age of four years.

Total,		$782,677,694 00
Total city tax,		$14,027,011 74

STATE OF PENNSYLVANIA, } *ss:*
CITY OF PHILADELPHIA, }

Simon Gratz, Isaac H. Shields and Rinaldo A. Lukens, Members of Board of Revision of Taxes, city and county of Philadelphia, being duly sworn or affirmed according to law do depose and say that the foregoing return of property taxable in the said city and county is just and true to the best of their knowledge and belief.

Sworn and affirmed before me this 8th day of July 1895.

GEORGE W. CLEMENT,
Notary Public.

(Philadelphia.)

SIMON GRATZ, ISAAC H. SHIELDS, RINALDO A. LUKENS, *Board of Revision of Taxes.*

The poor are maintained as a county charge. There is no separate levy for poor purposes. The money for the maintenance of the poor is drawn from the county funds by orders countersigned by the Board of Poor Directors on the County Treasurer. The amount expended is included in columns 4 and 5.

Twenty-seven thousand six hundred and sixteen dollars for roads and bridges is also a county charge and is included in columns 4 and 5.

Taxes collected on occupation is included in columns 4 and 5.

Penbrook borough only being incorporated last year there was no other tax levied except for the construction of streets, roads and bridges.

There was no tax levied in the borough of Uniontown for the construction of streets, roads and bridges on account of the taxes collected on licenses being sufficient to construct the same.

The poor are maintained as county charges. There is no separate levy for poor purposes. The money for the maintenance of the poor is drawn from the county funds upon presentation of a monthly statement and requisition by the Board of Poor Directors and countersigned by the County Commissioners. The amount thus expended for the year last passed is $54,735.73, which is included in the aggregates of columns 4 and 5.

The Directors of the Poor have drawn on requisitions on the County Commissioners $30,000 for the year's expenses for the support of the poor.

CONSOLIDATED TABULAR STATEMENT showing the entire amount of taxes collected or worked out for the maintenance of State, county, city, ward, borough and township governments; the total amount collected for the support of the poor; the total amount collected for the construction and repairs of streets, roads and bridges; the amount collected for school purposes; the amount collected on personal property, on occupations and licenses; the amount collected on the real estate of railroad corporations; the amount collected on the real estate of corporations other than railroads, including limited partnerships, in the several counties of the Commonwealth of Pennsylvania, between the first day of June, 1894, and the thirty-first day of May, 1895, made pursuant to the act of Assembly approved the ninth day of May, A. D. 1889.

Names of Assessment Districts.	No. 1. Amount of taxes collected for the support of the poor.	No. 2. Amount of taxes collected for the construction and repairs of streets, roads and bridges.	No. 3. Amount of taxes collected for schools and school purposes, not including any appropriation received from the State.	No. 4. Amount of taxes collected for any purpose not embraced in columns 1, 2 and 3, whether the same be State, county or local taxes.	No. 5. Total amount of taxes collected for all purposes, as set forth in the four preceding columns.	No. 6. Amount of taxes collected on personal property.	No. 7. Amount of taxes collected on occupations.	No. 8. Amount of taxes collected on licenses of all kinds, including wholesale and retail liquor licenses.	No. 9. Amount of taxes collected on the real estate of railroad corporations.	No. 10. Amount of taxes collected on the real estate of corporations other than railroads, including limited partnerships.

The amounts appropriated for the support of the poor in the city of Philadelphia and the county of Allegheny are given in column number one of the above table.

In all the counties where there is no poor tax reported or collected in column number one, the poor are a county charge and an annual appropriation is made by the county commissioners for their support. The table on the following page gives the names of the counties, as well as the amount appropriated by each. The same table shows the amounts appropriated for the construction and repairs of roads and bridges.
